Multitasking refers to performance of multiple tasks. The most prominent types of multitasking are situations including either temporal overlap of the execution of multiple tasks (i.e., dual tasking) or executing multiple tasks in varying sequences (i.e., task switching). In the literature, numerous attempts have aimed at theorizing about the specific characteristics of executive functions that control interference between simultaneously and/or sequentially active component of task-sets in these situations. However, these approaches have been rather vague regarding explanatory concepts (e.g., task-set inhibition, preparation, shielding, capacity limitation), widely lacking theories on detailed mechanisms and/ or empirical evidence for specific subcomponents. The present research topic aims at providing a selection of contributions on the details of executive

functioning in dual-task and task switching situations. The contributions specify these executive functions by focusing on (1) fractionating assumed mechanisms into constituent subcomponents, (2) their variations by age or in clinical subpopulations, and/ or (3) their plasticity as a response to practice and training.

Contact US! Trainer's Manual CRC Press

With its modern emphasis on the molecular view of physical chemistry, its wealth of contemporary applications, vivid full-color presentation, and dynamic new media tools, the thoroughly revised new edition is again the most modern, most effective full-length textbook available for the physical chemistry classroom. Available in Split Volumes For maximum flexibility in your physical chemistry course, this text is now offered as a traditional text or in two volumes. Volume 1: Thermodynamics and Kinetics; ISBN 1-4292-3127-0 Volume 2: Quantum Chemistry, Spectroscopy, and Statistical Thermodynamics; ISBN 1-4292-3126-2

Resources in Education Morgan & Claypool Publishers
Contents: (I) Trainer's Orientation: Purpose; Target Audience; Training Design; Instructional Approach; Materials and Equipment; Manual Format; (II) Modules: Introduction and History; Pharmacology of Medications; Initial Screening, Admission Procedures, and Assessment Techniques; Clinical Pharmacotherapy; Patient-Treatment Matching; Phases of Treatment; Approaches to Comprehensive Care and Patient Retention; Drug Testing as a Tool; Associated Medical Problems; Treatment of Multiple Substance Use; Treatment of Co-Occurring Disorders; MAT During Pregnancy. Illustrations.

Universal Access in Human-Computer Interaction. Access to Interaction
Cambridge University Press

This resource is written to follow the updated Cambridge IGCSE® Computer Science syllabus 0478 with examination

from June and November 2016.

National Information Center Elsevier
CONTACT US develops high-end professional English language communication skills for the BPO industry. This manual contains a comprehensive introduction to the course, outlining the teaching approach and describing the unit structure in detail. It includes model answers to the activities and keys to exercises as well as photocopiable materials.

Monthly Catalog of United States Government Publications McGraw-Hill ESL/ELT

The contributors to this book are all distinguished, internationally-known specialists working in the motor control and learning area. The result is a unique collection of papers that discuss many aspects of this intricate and diverse subject and at the same time manage to provide the reader with a good overview of the major topics.

The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in

July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 47 revised papers included in the third volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: universal access in the mobile context; ambient assisted living and smart environments; driving and interaction; interactive technologies in the physical and built environment.

Human Computer Interaction Handbook
CRC Press

This book, comprising two parts, is concerned with both the science and the art of foreign language teaching, with a particular, but not exclusive, focus on Asia. Under the theme of “Theoretical foundation and research”, Part 1 of this book informs the readers about recent efforts in theoretical and empirical research which have had an impact on foreign language teaching or promise to yield results that will shape its future. These studies, not just from the domain of foreign

language teaching but also its primary feeder disciplines of linguistics and second language acquisition, offer the necessary theoretical and conceptual foundation for both current and future research and practice. As its theme “Classroom practice and evaluation studies” suggests, Part 2 focuses on new and innovative developments in curricular and classroom practice, all built upon insights from research in the above-mentioned disciplines and poised to become standard practices. These projects include qualitative and quantitative evaluation studies which have yielded insightful data for the refinement and continued development of the projects and their underlying theoretical concepts.

The Research Manual Springer Nature
Winner of a 2013 CHOICE Outstanding Academic Title Award The third edition of a groundbreaking reference, *The Human-Computer Interaction Handbook: Fundamentals, Evolving Technologies, and Emerging Applications* raises the bar for handbooks in this field. This easy-to-use, chapter-by-chapter

companion to Mosby's *Pharmacy Technician: Principles and Practice, 5th Edition* helps you reinforce and master your understanding of key skills and concepts. Each chapter of this combination workbook and lab manual contains a wide variety of review questions, exercises, and experiential lab activities to help reinforce key concepts, encourage students to reflect critically, and relate to practice for success on the job. Combined with the core textbook, this learning package takes you from day one through graduation and certification! Comprehensive coverage designed to align with the ASHP curriculum and Pharmacy Technician certification exam blueprints Reinforce Key Concepts sections for review and practice Reflect Critically sections with realistic scenarios to encourage content assimilation and application Relate to Practice sections with laboratory exercises to provide hands-on practice to promote multi-dimensional skills mastery Competency checklists for all procedures to track your progress with textbook procedures. NEW! Chapters on drug classifications and pharmacy operations management NEW! Expansion

of aseptic technique and sterile compounding NEW! Additional emphasis on soft skills threaded throughout the pharmacy practice unit NEW! Additional competency checklists to correlate with procedures throughout pharmacy practice chapters

The Human-Computer Interaction Handbook
Walter de Gruyter

This lecture describes a theoretical framework for the behavioural sciences that holds high promise for theory-driven research and design in Human-Computer Interaction. The framework is designed to tackle the adaptive, ecological, and bounded nature of human behaviour. It is designed to help scientists and practitioners reason about why people choose to behave as they do and to explain which strategies people choose in response to utility, ecology, and cognitive information processing mechanisms. A key idea is that people choose strategies so as to maximise utility given constraints. The framework is illustrated with a number of examples including pointing, multitasking, skim-reading, online purchasing, Signal Detection Theory and diagnosis, and the influence of reputation on purchasing decisions. Importantly, these examples span from perceptual/motor coordination, through cognition to social interaction. Finally, the lecture discusses the challenging idea that people seek to find optimal strategies and also discusses the

implications for behavioral investigation in HCI.
