Interactive Notebooks: Science for grade 1 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about living and nonliving things, habitats, states of matter, light, soil, weather, and more! --This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive

notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. --Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused.

Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

workbooks provide  
children with a student-  
centered approach to  
scientific discovery.  
Each hands-on activity

---

presents a child with a challenging question that can be investigated and explored independently or with parent guidance. As part of the directed inquiry process, the child will answer this question by exploring the resources, following the outlined procedures of each activity, collecting data, and drawing conclusions. In some instances, parents might need to help children with certain

parts of the activity. Following the directed inquiry, the child will be given an opportunity to expand and demonstrate scientific reasoning by modifying the investigation and designing his or her own experiments to illustrate the concept. Utilizing these activities will encourage every child to think like a scientist and encourage him or her to be inquisitive. This curriculum has been

modified specifically for homeschool families. At times, there may be references to print or digital components that are not included within the homeschool bundle. This will not hinder your child's successful completion of the course.
