A tidal bore is a series of waves propagating upstream as the tidal flow turns to rising. It forms during spring tide conditions when the tidal range exceeds 4 to 6 m and the flood tide is confined to a narrow funnelled estuary. Its existence is based upon a fragile hydrodynamic balance between the tidal amplitude, the freshwater river flow conditions and the river channel bathymetry, and it is shown that this balance may be easily disturbed by changes in boundary conditions and freshwater inflow. This book demystifies the physics of a tidal bore and it thoroughly documents the tidal bores on our planet with reliable and accurate information. It aims to cultivate a passion for a beautiful, but fragile geophysical process, with in-depth updated content and by over 190 illustrations and photographs.

Modelled on the current MRCOG syllabus, Get Through MRCOG Part 2: EMQs is designed to test candidates' theoretical and practical knowledge of obstetrics and gynaecology. The book opens with an introductory section explaining the format of the examination, providing advice on how to prepare for it and how EMQs should be approached in order to obtain the highest marks. 320 EMQs are presented in the form of eight practice papers, reflecting the level of difficulty and style of the actual examination, and each answer is supplemented with a detailed explanation to help candidates assess and improve their own level of knowledge. Providing an invaluable bank of revision questions, Get Through MRCOG Part 2: EMQs is the essential revision guide for all specialist trainees preparing for this examination. The book is comprehensive and authoritative: Justin Konje was closely involved in pioneering the introduction of EMQs into the MRCOG examination and runs a highly regarded MRCOG Part 2 course in the UK.
