"Drawing relies on a clear vision. It also requires thought which, in, turn, builds understanding. Drawing cannot be detached from seeing and thinking about the fundamental nature of the subject matter being represented. The knowledge and understanding gained through drawing from life directly enhances our ability to draw from the imagination. Just as

thought can be put into words, ideas can be made visible in a drawing to promote visual thinking and further stimulate the imagination. Once what is seen or imagined is made visible in a drawing, the image takes on a life of its own and communicates graphically. However eloquently or crudely, all drawings, speak to the eye." This book sets out to explore the creation of interior atmosphere as seen through the lens of mise-en-scène. You will learn how this film theory informs the concept of 'staged space' translated through the narrative and expressive qualities of a particular scene. Jean Whitehead quickly takes this concept beyond the screen and considers its application to the interior 'setting'. By learning to use the ingredients that inform an 'interior' mise-en-scène such as its backdrop, choice of props, use of special effects alongside the application of colour, pattern, graphics, light and shadow, an immersive atmospheric experience can be created. Packed with inspiring examples and case studies, ranging from cinematic interiors and art installations, to the work of notable interior designers, stylists and architects with an interior interest, this book broadens current thinking around the design of the decorated interior. It will help you to embrace the concepts that underpin an interior mise-en-scène through the use of softer decorative techniques and concerns.
