[check out our alphabetical index at the back of our brochure](#)

Applying by brush. Use the largest brush possible. Long flexible bristles are best for gloss paints. When applying by brush a good technique is the 'Criss-Cross' method. Paint is applied to the surface with a diagonal brushing action from the left and right (1). This is then spread further with horizontal strokes (2) before finally 'laying off' with light vertical strokes (3).

Interlux Application Guide

Corners and details are best painted with a brush, large areas with the foam roll. Even though this step is most crucial for the top coat, it does not hurt to even out the paint with a foam brush. Keep in mind that you only have a limited time (depending on the temperatures) until the paint gets too stiff to properly run.

Expert Advice Always check the weather When painting outside, always check what weather conditions are anticipated during the preparation, application and drying phases of any project. Should fair weather prevail, whether or not to commence painting will then depend on the air and surface temperatures, humidity and dew point.
