Managerial Accounting for Managers, 2nd Edition by Noreen/Brewer/Garrison is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen book was created to serve customers who do not wish to teach the financial accounting-oriented content that is included in the Garrison book. Of our three books (the Brewer book, the Garrison book, and the Noreen book), the Noreen book is the most pure management accounting textbook. The other two books have greater amounts of financial accounting content. Managerial Accounting for Managers, 2nd Edition is geared towards professors who love Garrison's market-leading managerial accounting content, but have been bothered by the debits and credits included in the

book. It includes the same coverage of managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization without the journal entries. The job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting--planning, control, and decision making. Managerial Accounting Vikas Publishing House Intermediate Accounting continues to be the gold standard when it comes to helping students connect the what, how, and why of accounting. With strategic content updates for currency and the inclusion of topics that will resonate with today's students, the 14th Canadian Edition presents an active,

hands-on approach designed to develop problem solving skills and better prepare the next generation of accounting professionals. To promote a deeper understanding of course concepts, the text provides students with scaffolded, high-quality assessments and integrated practice opportunities at the point of learning. Integrated Cases and Research and Analysis questions help students take their understanding further as well, teaching them how to analyze business transactions, apply IFRS and ASPE, and explore the ways in which accounting standards impact real companies. Throughout the text, students will also have the chance to work through a variety of hands-on activities and resources, including Analytics in Action Features with real world applications and Data Analytics problems. These applications help students build confidence in their critical thinking skills, while simultaneously preparing them for the ever-evolving landscape of the accounting industry.

The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the

existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of *Accounting Education: An international journal*.
