The Horngren System
of instruction
replicates the
classroom experience
by providing more "I
get it" moments
outside of class.
We've talked to tons
of POA instructors
and our editors have
even taken the

accounting course (numerous times!) to figure out the following issue in this course that is consistent: Students understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. The Horngren system helps to recreate the

“I get it” moments outside of class-- keeping both you and the students on track.

Intermediate Accounting McGraw-Hill/Irwin
Don’t you love those moments in your course when students are fully engaged? When the “Aha!” revelations are bursting like fireworks? David Spiceland, Wayne Thomas, and Don Herrmann have developed a unique set of materials based directly on their collective years in the classroom. They’ve brought together best practices like highlighting Common Mistakes, offering frequent Let’s Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course with real-

world companies and decision analysis, and communicating it all in a student-friendly conversational writing style. After the proven success of the first three editions of Financial Accounting, we are confident that the fourth edition will not only motivate, engage, and challenge students—it will illuminate the financial accounting course like never before.

Financial Accounting

McGraw-Hill College

Financial Accounting: An Introduction 4e does not simply teach the accounting standards; it demonstrates that accounting is about 'how to' as well as 'why to' record and report information in a way that engages directly with Generation Y students.

An introduction Irwin

Professional Pub

Financial accounting is undergoing a period of unprecedented change. The FASB and IASB have been working together to issue converged accounting standards that will dramatically change key reporting areas, and more generally have sought to converge accounting standards over time. In late 2011, the SEC will announce its decision on whether large public companies in the U.S. will be able to choose whether to report under U.S. GAAP or IFRS or if all companies are anticipated to be reporting under IFRS in the near future. So, while there currently is considerable overlap between U.S. GAAP and IFRS, and that overlap is increasing as convergence continues, important differences remain. To help instructors

deal with the challenging environment, the Spiceland team is committed to providing current, comprehensive and clear coverage of intermediate accounting. The 7th edition reflects this commitment with the following innovations.

Working Papers McGraw-Hill/Irwin
