The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall

business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. Author Chris Edmonds has also created a highly popular and widely used series of video lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately.
