Intermediate Accounting Wiley Black Friday. The War on Christmas. Miracle on 34th Street and Elf. From shopping malls and Fox News to movie theaters, Christmas no longer solely celebrates to the birth of Christ. Considering the holiday in its global context, Christmas journeys from its historical origins to its modern incarnation as a global commercial event, stopping along the way to look at the controversies and traditions of the celebratory day. Delving into the long story of this unifying but also divisive holiday, Tara Moore describes the evolution of Christmas and the deep traditions that bind a culture to its version of it. She probes the debates that have long accompanied the season—from questions of the actual date of Christ's birth to frictions between the sacred and the secular—and discusses the characters associated with the holiday's celebration, including Saint Nicholas, the Magi, Scrooge,

and Krampus. She also explores how customs such as Christmas trees, feasting, and gift giving first emerged and became central facets of the holiday, while also examining how Christmas has been portrayed in culture—from the literary works of Charles Dickens to the yearly bout of holiday films, television specials, traditional carols, and modern tracks. Ultimately, Moore reveals, Christmas's longevity has depended on its ability to evolve. Packed with illustrations, Christmas is a fascinating look at the holiday we only think we know.

**The Economics of Conflict and
Peace** South Western

This paper investigates the
efficiency of household
investment decisions in a
unique dataset containing the
disaggregated wealth and
income of the entire
population of Sweden. The
analysis focuses on two main
sources of inefficiency in
the financial portfolio:
underdiversification of risky
assets ("down") and
nonparticipation in risky
asset markets ("out"). We
find that while a few
households are very poorly
diversified, the cost of
diversification mistakes is
quite modest for most of the
population. For instance, a
majority of participating
Swedish households are
sufficiently diversified
internationally to outperform
the Sharpe ratio of their
domestic stock market. We
document that households with
greater financial
sophistication tend to invest
more efficiently but also
more aggressively, so the
welfare cost of portfolio

inefficiency tends to be
greater for these households.
The welfare cost of
nonparticipation is smaller by
almost one half when we take
account of the fact that
nonparticipants would be
unlikely to invest efficiently
if they participated in risky
asset markets.
