Combustion Internal  
Engines, 4th ed, 2017 ...

In an internal combustion engine, the  
combustion of the fuel takes place within  
a combustion chamber in the presence of  
a suitable oxidiser (air, most often). The  
resultant rise in temperature and pressure  
from the combustion causes the  
movement of a specific part of the engine,  
the piston for example. This book,  
Internal Combustion Engines, gives the  
fundamental concepts and the specifics of  
various engine designs.
