Headache is the number one complaint that causes a patient to see a neurologist. Because headaches constitute such a large part of many clinicians practices, the United Council for Neurologic Subspecialties created an annually-administered headache subspecialty exam in 2006. Headache Medicine: Questions and Answers is the only question-and-answer book for the new headache subspecialty exam, with more than 500 questions, answers, explanations, and references to help readers self-assess their knowledge and to prepare for the subspecialty exam, as well as the neurology Board examination. Headache Medicine: Questions and Answers covers everything from the basics of epidemiology and comorbidity, to must-know clinical neurology, to diagnosis and treatment. Board-type review questions are used throughout, each with an answer, a detailed explanation, and one or more references to help direct more in-depth review as desired. Divided into six key sections for targeted topic review, this is the most comprehensive and effective way to prepare for exams. Key features of Headache Medicine include: Board-type question format used to provide familiarity with question types Answers and explanations, which detail not only why the answer is correct, but also why the distracters are wrong. A series of in-depth, multi-question patient management problems that provide a realistic clinical learning experience References with each question for further investigation as desired

Mayo Clinic Internal Medicine Board Review, 10th edition, is designed to meet the needs of

physicians-in-training and practicing clinicians by updating their knowledge of internal medicine and preparing them for the ABIM certification and maintenance-of-certification examinations in internal medicine. For the 10th edition, contributors were asked to map chapters according to ABIM goals. At least 50 percent of the material will be new, with the remainder changed and updated. The redesign is intended to cover all ABIM goals while streamlining the text to make it more user-friendly. Large chapters have been broken up into smaller content-oriented chapters to facilitate shorter, more focused study opportunities. This book is divided into subspecialty topics (eg, allergy, cardiology, dermatology, etc) and cross-content topics related to general internal medicine (eg, men's health, women's health, geriatrics, etc). Questions and answers have been pulled from the main text to a companion book of Q&As to facilitate study.
