Internal Medicine Board-style Questions :  
Q&A 2 Lippincott Williams & Wilkins  
This book is a question book that offers single best answers (SBA) to 300 questions related to topics in general medicine. In order to further enhance knowledge and understanding, detailed answers have been included. This book is designed as both a revision and learning aid, with questions being set in a mock-examination format which can be completed under timed conditions. The primary target audience of this book is clinical medical students who are revising for examinations. However, questions have been planned in a way that a fairly large secondary target audience will be reached as well. This includes students who are transitioning from pre-clinical to clinical. As recently qualified medical graduates who have had the option of both online and book-based questions, the authors feel that students often prefer a Single Best Answers book that aids them in advancing their medical knowledge rather

than online question banks, which can often have very repetitive and one-dimensional questions. Having questions in paper format replicates examination conditions better than online question banks and, therefore, offers a more realistic revision experience. In addition, though SBAs are becoming increasingly more common as an examination style with medical schools, there are very few SBA question books available. As such, medical students will find this book highly useful in the preparation for their examinations.

Mayo Clinic Internal Medicine Board Review, 10th edition, is designed to meet the needs of physicians-in-training and practicing clinicians by updating their knowledge of internal medicine and preparing them for the ABIM certification and maintenance-of-certification examinations in internal medicine. For the 10th edition, contributors were asked to map chapters according to ABIM goals. At least 50 percent of the material will be new, with the remainder changed and updated. The redesign is intended to cover all ABIM goals while streamlining the text to make it more user-friendly. Large chapters have been broken up into smaller content-oriented chapters to facilitate shorter, more focused study opportunities. This book is divided into subspecialty topics (eg, allergy, cardiology, dermatology, etc) and cross-content topics related to general internal medicine (eg, men's health, women's health, geriatrics, etc). Questions and answers have been pulled from the main text to a companion book of Q&As to facilitate study.
