Accounting, Finance, and Taxation in the Gulf Countries LexisNexis

Financial reporting practices differ widely between countries and this has far-reaching implications for multinational businesses. Over more than a century, there have been attempts to classify countries into groups by similarities of practices. With the recent spread of International Financial Reporting Standards, it might appear that classification is largely of historical interest, but this is not the case, for several reasons explained in this book. Christopher Nobes offers a critical analysis of the many previous accounting classifications, having drawn lessons from other fields of science and social science. Revised and updated to reflect the IFRS era, the book discusses how old classifications are reflected in today's international differences in practice under IFRS. It concludes with a discussion on the most useful classifications, and how classifications can still be relevant in the era of international standards. This book will be essential for academics, postgraduates and undergraduates in

international accounting, accounting theory and to international accounting professionals.

This title is one of six releases from the LexisNexis Graduate Tax Series. United States International Taxation embodies the dual goals established for the LexisNexis Graduate Tax Series: to provide graduate tax students with a solid foundation in the applicable rules and to enhance their skills in reading and applying complex statutes and regulations. To this end, the text relies very little on the often-times laborious analysis of cases and other sources that are secondary to the Code and the regulations. Instead, each chapter provides an overview of the substantive content, with emphasis on important issues that are not apparent from the language of the Code and regulations. This book contains teaching materials for law school courses in the United States federal income taxation of persons engaged in cross-border activities and transactions. It contains 21 separate Units that address fundamental concepts of residency and source, the taxation of United States persons (citizens, residents, and domestic corporations) on their activities within the United States, and the safeguard rules in place to curtail potentially abusive tax avoidance in the international context.
