This includes completely revising several key chapters, including Chapter 6, on International Trade. This is entirely updated and includes new case studies covering both the trade-war between the US and China and the complex Brexit process. These and other real-world developments have made a wide range of stakeholders much more aware of the significance of global trade interdependencies than in the past. Chapter 16 on the European Union is also entirely updated to take account of Brexit and a range of new socio-political and economic events in Europe. Chapter 11 ('MNEs as Responsible Stakeholders') has been removed, making this edition more consolidated, with 20 rather than 21 chapters. In place of Chapter 11 we have inserted new sections, frameworks and case studies on responsible business throughout the book as a fundamental dimension of international business theory and practice across all the other chapters. New case studies, such as 'Businesses and NGOs working together on climate change' in Chapter 4, provide additional material on

this topic. Chapter 14, on 'Political risk and negotiation strategy' also features new case studies on the 'US-Venezuela oil dispute' and 'Huawei accused of spying'

Good economic decision making is fundamental to the success of business. Economic decisions lie at the heart of business. Economics is all about the choices between alternatives and how to weigh up their costs and benefits. Studying this book will help you understand such choices and how to make them successfully when you take up a job or perhaps run your own business. Businesses need to make choices of what and how much to produce, what techniques to use, who to employ, what investment to make, where to locate, what markets to develop and how best to compete with rivals. Economics helps them make the right decisions. But making the right decisions depends on the economic environment in which businesses operate. For example, government policy affects business: whether through taxation, subsidies, training and education, regulation or trade policies. The economic environment is also affected by trade relations and the actions of international bodies such as the World Trade Organization (WTO) and the International Monetary Fund (IMF). Issues such as Brexit, trade deals and migration crucially affect businesses. The book shows you how. You will be studying all these issues and more in this book. It will give you the skills to advise businesses and other organisations on how best to achieve their objectives. The advice of economists is crucial to good decision making. But to give good advice requires understanding issues and

assessing evidence. Studying economics helps to give you this understanding and makes you a better problem solver.

Huddled over her mother's deathbed, Carmelita leans close as she hears the story of how she came to be. A kitchen worker in the sprawling Mexican estate of a mining mogul, her mother, Edelmidia, was brutally raped by an Irish immigrant supervisor. Furious and feeling helpless, Edelmidia steals a bejeweled antique cross, handed down since the days of Cortez, and plants it in the room of her rapist hoping for revenge. She gets her wish, and the man is run out of town as a thief. Edelmidia marries a miner who Carmelita always came to think of as her father, but the true biological identity of her father is unclear. Carmelita sets out to find the truth about her father, the cross-missing for years and said to bring good fortune-and herself, sparking events that lead to the Mexican Revolution.
