Rapid improvements and constant advancements in information technology have inevitably lead to significant changes for businesses across the globe. As a result, some of these large shifts have unfortunately ended in major financial crises.

Technology and Financial Crisis: Economical and Analytical Views investigates financial crises from unique points of view. Not only does this publication consider the broader economical implications that a financial crisis can have on one business or on a whole country, but it also thoroughly discusses the smaller areas which are affected or contribute to the downfall. This book is intended to be of use to the public sector, researchers, practitioners, and educators who are interested in the affects of a financial crises and possible ways to reduce such large scale problems in the future.

A classic resource in the modern study of the anthropology of law, this book is now widely available again in an updated and expanded edition. There are many societies that survive in a remarkably orderly fashion without the help of judges, law courts and policemen. They are small in scale and have relatively simple technologies, lacking those centralized

agencies which we associate with legal systems; yet early anthropologists did not hesitate to name “ law, ” along with kinship, politics and religion, as one of the facets of their subject. Simon Roberts contends, however, that legal theory has become too closely identified with our own arrangements in western societies to be of much help in cross-cultural studies of order. But conversely, by looking at the ways in which other societies keep order and solve disputes, he sheds valuable light on the contemporary debates about order in our own society, in a straightforward text which will be accessible to the general reader and anthropologist alike. Now in its Second Edition with

a new Foreword and Afterword by the author, this renowned introduction to the anthropology of law is part of the Classics of Law & Society Series from Quid Pro Books. Concepts, Methodologies, Tools, and Applications Ballantine Books
MARKETING: THE CORE, 2/e by Kerin, Berkowitz, Hartley, and Rudelius continues the tradition of cutting-edge content and student-friendliness set by Marketing 8/e, but in a shorter, more accessible package. The Core distills Marketing 8/e's 22 chapters down to 18, leaving instructors just the content they need to cover the essentials of marketing in a single semester. Instructors using The Core also benefit from a full-sized supplements package. The Core is more than just a "baby Kerin"; it combines great writing

style, currency, and supplements into the ideal package.

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective.

International Business is examined from the USA angle, going on to address IB issues from other countries '

perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software

The Past, Present and Future of International Business and Management McGraw-Hill/Irwin

This book outlines features of international business transactions, and discusses their various associated risks. For the successful completion of an international business transaction, depending on its terms, both parties need access to funds. This text deals with financing mechanisms mainly in the international sale of goods and in overseas construction projects. Concerning financing international sale of goods, it discusses export working capital financing, documentary credit, negotiation of bills of exchange, export factoring, and

international forfaiting. Concerning financing an overseas construction project, this book discusses supplier and buyer credit, project finance, syndicated loans, and independent guarantees (or standby letters of credit). The book also covers export credit insurance (or export credit guarantee), which is very useful for the facilitation of financing in the international sale of goods and in overseas construction projects.

This second decade of the millennium finds the world changing at a once unimaginable pace.

Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and

growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different

business specialisations set
the theoretical foundations
of contemporary thinking
and present their practical
implementations.
