Uniform Law for International Sales Under the 1980 United Nations Convention Addison-Wesley Longman

The Sixth Edition of Transnational Business Problems combines the best aspects of a conceptual, systemic approach and a problems approach. It provides a sophisticated intellectual framework for understanding the most significant contractual and regulatory issues in international business. At fewer than 600 pages, this compact book is ideal for a one-semester course. One Volume. Transnational Business Problems presents the important practical and policy aspects of international transactions in one reasonably-sized volume. Covers Systemic Issues First. Transnational Business Problems considers systemic issues first. Four introductory chapters discuss the role of the international lawyer, the resolution of international disputes, the relationship between international and domestic law, the extraterritorial reach of domestic law, and corporate social responsibility. Problems Approach. The introductory chapters are followed by eight problems, each focused on a different kind of transaction: transnational sales, agency and distributorship agreements, licensing, foreign direct investment, mergers and acquisitions, joint ventures, concession agreements, and international debt instruments. Each problem covers both contractual and regulatory issues. Nearly all begin with a sample contract. Sophistication. The book uses primary source materials--draft contracts, statutes, regulations, treaties, cases, and arbitral awards--that allow students, with help from the text, to work through issues in a realistic way. The book goes beyond the nuts and bolts of transactions to encourage consideration of broader policy issues: from the liability of corporations for human rights violations to restrictions on foreign investment; from the compulsory licensing of HIV drugs to the restructuring of sovereign debt. Geographical Diversity. Transnational Business Problems reflects the geographical diversity of business today. The problems focus on China, the European Union, the Andean Community, Mexico, and Brazil. Materials from other parts of the world are included in the introductory chapters. Intellectual Heritage. Transnational Business Problems grows out of a rich intellectual heritage that began with Milton Katz and Kingman Brewster's International Transactions and evolved into

Henry Steiner and Detlev Vagts's Transnational Legal Problems. The book views transnational business problems as a particular species of transnational legal problem that both generates and is influenced by transnational legal process. Fully Updated. The Sixth Edition of Transnational Business Problems is fully updated to account for developments through the start of 2019. The introductory chapters and many of the problems have been substantially revised. Every year between editions the authors provide an update in memo form that teachers can distribute as a supplement to their classes.

Hospitality Law: Managing Legal Issues in the Hospitality Industry, Fifth Edition takes an applied approach to the study of hospitality law with its touchstone of compliance and prevention. The book is highly pedagogical and includes many interactive exercises and real world cases that help students focus on the practical application of hospitality laws and model their decision process to avoid liability. As a result, this book does look different than others on the market as the legal information contained is carefully selected to specifically correlate with helping students understand how to do the right thing, i.e., it is not a comprehensive book on the laws. Barth immediately helps readers learn about the legalities of situations and work through exercises -- both individually and in groups -- to effectively apply them to hospitality management situations. Many instructors teach their course from a very applied perspective, which aligns with Barth's approach.

Concise Australian Commercial Law, now in its fifth edition, has two basic objectives: to provide students with a general understanding of the legal environment of business and to expose them to the language and perspectives of legal professionals, regulators and other commercial actors; and to provide a reference point for non-law students studying key commercial law topics - the law of contract, torts, consumer protection, agency, business organisations and business ethics - in a way that is clear, accessible and challenging for a non-law student. The authors have selected cases that should be of interest to non-law students and every effort has been made to ensure that the case extracts contain sufficient information to enable students to discuss and debate the decisions that a court has reached and appreciate how the principles could be applied in a commercial environment. Similarly the relevant legislation is discussed in a way that is designed to promote understanding of the law and the policy considerations behind the legislation. The fifth edition been updated to incorporate the many legislative changes and case law developments since the last edition. These updates include: a revised introduction (including a guide on how to approach the study of commercial law); a number of new contract law cases and an expanded section on online contracting; amendments to the Australian Consumer Law as well as a number of interesting new cases concerning consumer protection; case law developments in relation to the standard of care and causation in negligence; the recent 'safe harbour' amendments to the Corporations Act and a number of new cases dealing with directors' duties; and revisions to the chapter on Business Ethics to include references to the Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry (the Banking Royal Commission). To ensure the text is a more complete teaching and learning package, there is a revised set of activities at the end of each chapter that have been written with the non-law student in mind and can readily be used in a student-centred group work environment.

Today, global competition obliges companies dealing in international trade to modernize their procedures of delivery in order to minimize the customs burden and simplify the relation with customs authorities. Customs planning is the current option to be effective in the worldwide marketplace.
