Human rights and conflict resolution have been traditionally perceived as two separate fields, sometimes in competition or in tension and occasionally with contradictory approaches towards achieving a lasting peace. Although human rights norms have been incorporated and institutionalized by various national, regional, and international organizations that deal with conflict resolution, negotiators and mediators are often pressured in practice to overlook international human rights principles in favor of compliance and more immediate outcomes. The chapters in this volume navigate the relationship between human rights and conflict resolution by fleshing out practical, conceptual, and institutional encounters of the two agendas and engaging with lessons learned and windows of opportunities for mutual learning. Recognizing the increasing relevance of this debate and important gaps in the current research on the topic, this book addresses the following questions: How can we improve our practical and theoretical understanding of the complementarity between human rights and conflict resolution? How would a human rights-based approach to conflict resolution look like? How are international, regional, and national organizations promoting, implementing, and/or adapting to better coordinate between human rights and conflict resolution? Building on empirical evidence from contemporary conflict resolution processes, how have human rights been integrated in different efforts on the ground? What are the main lessons learned in this regard? Examining a wide range of countries and issues, this work is essential reading for human rights, conflict resolution, and security experts including scholars, diplomats, policy-makers, civil society representatives, and students of international politics.

In this remarkably comprehensive work, Edward Thomas provides a multi-layered examination of what is happening in the country today. Writing from the perspective of South Sudan's most mutinous hinterland, Jonglei state, the book explains how this area was at the heart of South Sudan's struggle. Drawing on hundreds of interviews and a broad range of sources, this book gives a sharply focused, fresh account of South Sudan's long, unfinished fight for liberation.

[Environmental Conflict Resolution](#) Rowman & Littlefield

The analysis and interpretation of conflicts can be a dangerously simplistic exercise. A western, developed socio-economic perspective can simplify conflicts in the so-called 'Third World' as the inevitable struggles of people who cannot coexist because of ethnic, religious or cultural differences. While acknowledging that many contemporary conflicts are characterised and influenced by these factors, this book calls for an approach to conflict prevention and resolution which mainly addresses the underlying political, economic and social causes. The conflict in Sudan, where narratives evolved from an interpretation based on religious differences between a Muslim North and the Christian South, provides a case study through which the author explores how most prevention and resolution strategies were based on flawed assumptions leading to poor results. By focusing instead on the underlying socio-economic inequality and marginalisation among groups she analyses the dynamics of the complex peace process to ascertain if and how economic and social rights were effectively included and implemented as a part of the peace agreement, including after South Sudan's independence.

his resolution techniques. With an emphasis on the exchange involved in negotiation, Lederach conveys the key to successful conflict resolution: understanding how to guide disputants, transform their conflicts, and launch a process that empowers them.

**Creativity and Conflict Resolution** Cambridge Scholars Publishing

This book suggests a new explanation for why international peace interventions often fail to reach their full potential. Based on several years of ethnographic research in conflict zones around the world, it demonstrates that everyday elements - such as the expatriates' social habits and usual approaches to understanding their areas of operation - strongly influence peacebuilding effectiveness. Individuals from all over the world and all walks of life share numerous practices, habits, and narratives when they serve as interveners in conflict zones. These common attitudes and actions enable foreign peacebuilders to function in the field, but they also result in unintended consequences that thwart international efforts. Certain expatriates follow alternative modes of thinking and acting, often with notable results, but they remain in the minority. Through an in-depth analysis of the interveners' everyday life and work, this book proposes innovative ways to better help host populations build a sustainable peace.

**International Conflict Resolution** Rowman & Littlefield Publishers

International conflict has long plagued the world, and it continues to do so. With many interstate and civil disputes experiencing no third-party attempts at conflict management, how can the international community mitigate the effects of and, ultimately, end such violence? Why, in so many cases, are early, "golden opportunities" for conflict management missed? In this book, J. Michael Greig, Andrew P. Owsiak, and Paul F. Diehl introduce the varied approaches and factors that promote the deescalation and the peaceful management of conflict across the globe - from negotiation, mediation, arbitration, and adjudication to peace operations, sanctions, and military or humanitarian intervention. The history, characteristics and agents of each approach are examined in depth, using a wide range of case studies to illustrate successes and failures on the ground. Finally, the book investigates how the various tools interact - both logically and sequentially - to produce beneficial or deleterious effects. *International Conflict Management* will be essential reading for scholars and students of international peace and security studies, as well as practitioners working with governments, international organizations, non-profits, and post-conflict societies

**Graduate Programs in the Humanities, Arts & Social Sciences 2015 (Grad 2)** Polity

This book examines the remaking of women's citizenship in the aftermath of conflict and international intervention. It develops a feminist critique of consociationalism as the dominant model of post-conflict governance by tracking the gendered implications of the Dayton Peace Agreement. It illustrates how the legitimisation of ethnonationalist power enabled by the agreement has reduced citizenship to an all-encompassing logic of ethnonational belonging and implicitly reproduced its attendant patriarchal gender order. Foregrounding women's diverse experiences, the book reveals gendered ramifications produced at the intersection of conflict, ethno-nationalism and international peacebuilding. Deploying a multidimensional feminist approach centred around women's narratives of belonging, exclusion, and agency, this book offers a critical interrogation of the promises of peace and explores individual/collective efforts to re-imagine citizenship.

**Peace and Conflict 2017** Routledge

Ethno-national conflict is one of the central issues of modern politics. Despite the emergence of approaches to managing it, from nation-building to territorial autonomy, in recent years, the application of these approaches has been uneven. Old conflicts persist and new ones continually emerge. The authors of this book contend that what is needed to drive forward the theory and practice of ethno-national conflict management is a more nuanced understanding of ethnicity and nationalism. The book addresses this issue by linking theories of ethnicity and nationalism to theories of conflict management. Its contributors share a common goal of demonstrating that a nuanced understanding of ethnicity and nationalism can beneficially inform conflict management in theory and practice. To do so, they analyse both hot and cold conflict zones, as well as cases that have been important in the development of the most widely-used conflict management models. The book is aimed at those interested in the theory and practice of ethno-national conflict management as well as the study of ethnicity and nationalism. It is well-suited for undergraduate and advanced research students, experts and policy-makers. This book was originally published as a special issue of *Commonwealth and Comparative Politics*.
