International economic law  
 broadly refers to the legal and  
 regulatory architecture that  
 governs our global economy. The  
 rules and institutions of  
 international economic law  
 constitute the framework within

which cross-border economic  
 transactions, for example, trade,  
 finance and investment, take  
 place. On this programme, you  
 will study the legal and other  
 regulatory foundations of the  
 global economy.
