During July 10-13, 2011, 68 participants from 32 countries gathered in Istanbul, Turkey for a workshop organized by the United States National Research Council on Anticipating Biosecurity Challenges of the Global Expansion of High-containment Biological Laboratories. The United States Department of State's Biosecurity Engagement Program sponsored the workshop, which was held in partnership with the Turkish Academy of Sciences. The international workshop examined biosafety and biosecurity issues related to the design, construction, maintenance, and operation of high-containment biological laboratories-equivalent to United States Centers for Disease Control and Prevention biological safety level 3 or 4 labs. Although these laboratories are needed to characterize highly dangerous human and animal pathogens, assist in disease surveillance, and produce vaccines, they are complex systems with inherent risks. Biosecurity Challenges of the Global Expansion of High-Containment Biological Laboratories summarizes the workshop discussion, which included the following topics: Technological options to meet diagnostic, research, and other goals; Laboratory construction and commissioning; Operational

maintenance to provide sustainable capabilities, safety, and security; and Measures for encouraging a culture of responsible conduct. Workshop attendees described the history and current challenges they face in their individual laboratories. Speakers recounted steps they were taking to improve safety and security, from running training programs to implementing a variety of personnel reliability measures. Many also spoke about physical security, access controls, and monitoring pathogen inventories. Workshop participants also identified tensions in the field and suggested possible areas for action. Report to the 76th General Convention 2009 National Academies Press
In April 2015, the Institute of Medicine convened a public workshop to explore recent shifts in the health and health care industry and their implications for health professional education (HPE) and workforce learning. This study serves as a follow-up to the 2009 Lancet Commission report on health professions education for the 21st century and seeks to expand the report's messages beyond medicine, nursing, and public health. Envisioning the Future of Health Professional Education discusses opportunities for new platforms of communication and learning, continuous education of the health workforce, opportunities for team-based care and other types of collaborations, and social accountability of the health professions. This study explores the implications that shifts in health, policy, and the health care industry could have on HPE and workforce learning, identifies learning platforms that could facilitate effective knowledge transfer with improved quality and efficiency, and discusses opportunities for building a global health workforce that

understands the role of culture and health literacy in perceptions and approaches to health and disease.

Educating for the Knowledge Economy? National Academies Press
Growing up in the early 70s I loved Motown music and of course, if you love Motown you loved Smokey Robinson and the Miracles. They made a lot of great music, but their only number one Pop and R&B hit was the 1970s smash, "The Tears of a Clown". The song is full of irony and innuendo as Smokey explains "Just like Pagliacci (the tragic Italian clown) did, I try to keep my sadness hid, smiling in the public eye... but in my lonely room, I cry the tears of a clown...when there's no one around." Twenty years later I found out what Smokey meant when he said, "If there's a smile on my face I'm just trying to fool the public". Not quite 30 years old and serving my second pastorate, there were some days that I had to paint on a face in order to hide my true feelings of fear, loneliness, and rejection. The seventh century BC prophet Jeremiah could attest that the preacher's job is often unappreciated and at best misunderstood. In many of those anxious, uncomfortable hours, I found consolation in writing sermons. Paul explained to the Corinthian church, "Since God in His wisdom saw to it that the world would never know Him through human wisdom, He used our foolish preaching to save those who believe" (1 Corinth 1:21 NLT). In this volume and the remaining six you will read my tears, written when no one was around. As for the designation "a clown", I would imagine every preacher in every culture feels like a clown sometimes, trying to keep the folks at the circus engaged while

dealing with personal conflicts. Workshop Summary Routledge
Established in 1911, The Rotarian is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about, or of interest to, Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners – from Mahatma Gandhi to Kurt Vonnegut Jr. – have written for the magazine.
Building the Innovation Economy: Summary of a Symposium National Academies Press
This book deals with not just complex linkages, interactions and exchanges that form the relationship between the economic activities, human society and the ecosystems, but also the influences and impacts that each causes on the other. In recent times, this ecology – economy – society interface has received unprecedented attention within the broader environment – development discourse. The volume is in honour of Kanchan Chopra, one of the pioneers of research in these areas in India. She has recently been awarded the coveted Kenneth Boulding Award by the International Society for Ecological Economics (ISEE) and is the first Asian to receive it. The four sub-themes of the book reflect some of the important areas in the environment – development discourse — sustainability of development, institutions and environmental governance, environment and well-being, and ecosystem and conservation. Within each of the sub-themes, the policy and the practice as well as the macro and micro aspects are addressed. With contributions mainly from ecological economists and ecologists, the book's approach is interdisciplinary, both in spirit and content, reflecting the honoree's work, which went not just beyond the mainstream ideology of economics, but also the way she listened to ideas from disciplines like ecology and sociology. The volume also includes two reflective essays on academic life and works of Kanchan Chopra. The book is a valuable resource for students, teachers, researchers, practitioners and policy makers in the areas of development economics, ecological economics, environmental economics and related disciplines such as conservation, development, ecology, economics, environment, governance, health, sociology and public policy.

New York's Nanotechnology Model: Building the Innovation Economy is the summary of a 2013 symposium convened by the National Research Council Board on Science, Technology, and Economic Policy and members of the Nano Consortium that drew state officials

and staff, business leaders, and leading national figures in early-stage finance, technology, engineering, education, and state and federal policies to review challenges, plans, and opportunities for innovation-led growth in New York. The symposium participants assessed New York's academic, industrial, and human resources, identified key policy issues, and engaged in a discussion of how the state might leverage regional development organizations, state initiatives, and national programs focused on manufacturing and innovation to support its economic development goals. This report highlights the accomplishments and growth of the innovation ecosystem in New York, while also identifying needs, challenges, and opportunities. New York's Nanotechnology Model reviews the development of the Albany nanotech cluster and its usefulness as a model for innovation-based growth, while also discussing the New York innovation ecosystem more broadly.

Zimbabwe Edward Elgar Publishing

In the 1990s, many evangelical Christian organizations and church leaders began to acknowledge their long history of racism and launched efforts at becoming more inclusive of people of color. While much of this racial reconciliation movement has not directly confronted systemic racism's structural causes, there exists a smaller countermovement within evangelicalism, primarily led by women of color who are actively engaged in antiracism and social justice struggles. In *Unreconciled* Andrea Smith examines these movements through a critical ethnic studies lens, evaluating the varying degrees to which evangelical communities that were founded on white supremacy have addressed racism. Drawing on evangelical publications, sermons, and organization statements, as well as ethnographic fieldwork and participation in evangelical events, Smith shows how evangelicalism is largely unable to effectively challenge white supremacy due to its reliance upon discourses of whiteness. At the same time, the work of progressive evangelical women of color not only demonstrates that evangelical Christianity can be an unexpected place in which to find theoretical critique and social justice organizing but also shows how critical ethnic studies' interventions can be applied broadly across political and religious divides outside the academy.

Leading scholars from the US, the UK, Australia and New Zealand question whether current policies relating to knowledge, learning and assessment are consistent with the kinds of workers and skills required for the knowledge economy?

Military Ethics and Emerging Technologies Springer
Health is a highly valued, visible, and concrete investment that has the power to both save lives and

enhance the credibility of the United States in the eyes of the world. While the United States has made a major commitment to global health, there remains a wide gap between existing knowledge and tools that could improve health if applied universally, and the utilization of these known tools across the globe. The U.S. Commitment to Global Health concludes that the U.S. government and U.S.-based foundations, universities, nongovernmental organizations, and commercial entities have an opportunity to improve global health. The book includes recommendations that these U.S. institutions increase the utilization of existing interventions to achieve significant health gains; generate and share knowledge to address prevalent health problems in disadvantaged countries; invest in people, institutions, and capacity building with global partners; increase the quantity and quality of U.S. financial commitments to global health; and engage in respectful partnerships to improve global health. In doing so, the U.S. can play a major role in saving lives and improving the quality of life for millions around the world.

Around the world, legal information managers, law librarians and other legal information specialists work in many settings: law schools, private law firms, courts, government, and public law libraries of various types. They are characterized by their expertise in working with legal information in its many forms, and by their work supporting legal professionals, scholars, or students training to become lawyers. In an ever-shrinking world and a time of unprecedented technological change, the work of legal information managers is challenging and exciting, calling on specialized knowledge and skills, regardless of where in the world they practice their profession. Their role within legal systems contributes substantially to the administration of justice and the rule of law. This International Handbook addresses the policy and strategic issues with which legal information managers and law librarians need to engage in the context of the diverse legal environments in

which they work. It provides resources, analysis, and considered studies on an international basis for seasoned professionals, those about to enter the field, and anyone interested in the evolution of legal information in the twenty-first century.

Tears of a Clown Routledge

The Academic Job Search Handbook is the comprehensive guide to finding a faculty position in any discipline. Building on the groundbreaking success and unique offerings of earlier volumes, the fifth edition presents insightful new content on aspects of the search at all stages. Beginning with an overview of academic careers and institutional structures, it moves step by step through the application process, from establishing relationships with advisors, positioning oneself in the market, learning about job openings, preparing CVs, cover letters, and other application materials, to negotiating offers. Of great value are the sixty new sample documents from a diverse spectrum of successful applicants. The handbook includes a search timetable, appendices of career resources, and a full sample application package. This fifth edition features new or updated sections on issues of current interest, such as job search concerns for pregnant or international candidates, the use of social media strategies to address CV gaps, and difficulties faced by dual-career couples. The chapter on alternatives to faculty jobs has been expanded and presents sample resumes of PhDs who found nonfaculty positions. For more than twenty years, The Academic Job Search Handbook has assisted job seekers in all academic disciplines in the search for faculty positions at different kinds of institutions from research-focused universities to community colleges. Current faculty who used the book themselves recommend it to their own students and postdocs. The many new first-person narratives provide insight into issues and situations candidates may encounter such as applying for an international job, combining parenting with an academic career, going from an administrative job to a faculty position, and seeking faculty positions as a same-sex couple.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Avoiding a Lost Generation National Academies Press

This volume looks at current and emerging technologies of war and some of the ethical issues surrounding their use. Although the nature and politics of war never change, the weapons and technologies used in war do change and are always undergoing development. Because of that, the arsenal of weapons for twenty-first century conflict is different from previous centuries. Weapons in today's world include an array of instruments of war that include, robotics, cyber war capabilities, human performance enhancement for warriors, and the proliferation of an entire spectrum of unmanned

weapons systems and platforms. Tactical weapons now have the potential of strategic results and have changed the understanding of the battle space creating ethical, legal, and political issues unknown in the pre-9/11 world. What do these technologies mean for things such as contemporary international relations, the just-war tradition, and civil-military relations? Directed at readers in the academic, scientific, military, and public policy communities, this volume offers current thought on ethics and emerging technologies from internationally-recognized scholars addressing the full spectrum of issues in present warfare technology. It includes current and ongoing topics of multi-discipline and international interest, such as ethics, law, international relations, war studies, public policy, science and technology. This book was originally published in various issues and volumes of the Journal of Military Ethics.

Development Challenges, South-South Solutions: May 2009 Issue National Academies Press

The twenty-first century is marked by mass migration. Massive population movements of the last century have radically challenged our study and practice of mission. Where the church once rallied to go out into "the regions beyond," Christian mission is currently required to respond and adapt to "missions around." As a result, leaders in this field have been developing diaspora missiology to provide a missiological framework for understanding and participating in God's redemptive mission among peoples living outside their places of origin. In this volume, experts in diaspora missiology from across the globe analyze the development of missions to migrants and add to our understanding of the contemporary church's opportunities and responsibilities for mission amongst diaspora groups.

How to Minimize the Impact of the Great Recession on Young Workers: Hearing Before the Joint Economic Committee, Congress of the United States, One Hundred Eleventh Congress, Second Session, May 26, 2010 Xlibris Corporation

"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes

are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.

From Racial Reconciliation to Racial Justice in Christian Evangelicalism Duke University Press

The need for Afrikan mind regeneration and spiritual reawakening A people who have lost these two principal inner qualities of mind can hardly find their through selves in life. This book is an attempt to begin the processes of African self-rediscovery. The ending of slavery and colonialism removed only our physical agony, but the trauma of long and extended torture left deep rooted anguish within the psyche of African race. The effects of this imprint legacy will continue until we start addressing these negative effects. In an effort to do this, the book has provided several suggestions. Some of the program are being provided at the Institute of Mind Talk Afrika.

Strengthening Forensic Science in the United States Routledge

The perception of Central Asia and its place in the world has come to be shaped by its large oil and gas reserves. Literature on energy in the region has thus largely focused on related geopolitical issues and national policies. However, little is known about citizens' needs within this broader context of commodities that connect the energy networks of China, Russia and the West. This multidisciplinary special issue brings together anthropologists, economists, geographers and political scientists to examine the role of all forms of energy (here: oil, gas, hydropower and solar power) and their products (especially electricity) in people's daily lives throughout Central Asia and the Caucasus. The papers in this issue ask how energy is understood as an everyday resource, as a necessity and a source of opportunity, a challenge or even as an indicator of exclusionary practices. We enquire into the role and views of energy sector workers, rural consumers and urban communities, and their experiences of energy companies' and national policies. We further examine the legacy of Soviet and more recent domestic energy policies, the environmental impact of energy use as well as the political impact of citizens' energy grievances. This book was published as a special issue of Central Asian Survey.
