International Corporate

Finance Tata McGraw-Hill Education

Discover how practical international finance can be with the unique blend of international finance theory and current applications found in INTERNATIONAL FINANCIAL

MANAGEMENT, ABRIDGED EDITION, 9E.

Using familiar companies such as Nike, author Jeff

Madura clearly explains international finance in understandable terms with the support of hands-on applications. The book focuses on management

decisions that maximize a firm's value. Readers examine some of the latest developments in international finance with the text's timely examples and extensive links to related Internet content. New Excel exercises and a variety of multinational corporation projects help readers refine their international finance skills. This Abridged Edition provides flexibility and an economical text choice by offering all chapters from the Full Edition but makes several of the chapters that are less frequently used

International Financial  
Management Cambridge  
University Press

The overriding objective of Eun and Resnick's International Financial Management, 3e is to teach students how to be effective global financial managers. The text covers the fundamentals of the macroeconomic environment of international financial management, discusses the financial environment in which the multinational firm and its managers must function, and covers foreign exchange management and financial management in a multinational firm.

specialist work on the arbitration of international financial disputes. The work covers commercial and investment arbitrations and considers the merits of and relationship between the various types of dispute resolution (mediation, arbitration and litigation). International arbitration is a growth area and financial disputes have been a consequence of the financial crisis. The need for more specialist knowledge during the conduct of disputes involving complex financial instruments has become particularly apparent in recent years. This book explains the various financial products including debt and equity instruments, currencies, commodities, derivatives and Islamic instruments and provides guidance on how to draft arbitration clauses with these products in mind. In the part on theories of liability, the issues of applicable law, expropriation, discrimination, fair and equitable treatment, and umbrella clauses are explained. There are separate chapters on remedies and choice of law, in addition to the more procedural aspects of enforcement and expert witness. The interplay between mediation and arbitration is analyzed and explained. This is a key reference tool for all practicing lawyers and arbitrators advising on disputes where financial products are involved. Drawing together some of the leading names in this specialist field the work provides some of the best and most recent analysis of law and practice relevant to such disputes.
