Identity in the Public Sector Routledge

This book systematically maps and assesses business lobbying in the European Union, drawing from political science and business studies.

The Handbook of Public Sector Communication John Wiley & Sons

Despite predictions that 'new public management' would establish itself as the new paradigm of Public Administration and Management, recent academic research has highlighted concerns about the intra-organizational focus and limitations of this approach. This book represents a comprehensive analysis of the state of the art of public management, examining and framing the debate in this important area. The New Public Governance? sets out to explore this emergent field of research and to present a framework with

which to understand it. Divided into five parts, the book examines: Theoretical underpinnings of the concept of governance, especially competing perspectives from Europe and the US Governance of inter-organizational partnerships and contractual relationships Governance of policy networks Lessons learned and future directions Under the steely editorship of Stephen Osborne and with contributions from leading academics including Owen Hughes, John M. Bryson, Don Kettl, Guy Peters and Carsten Greve, this book will be of particular interest to researchers and students of public administration, public management, public policy and public services management.

Innovation in Public Sector Services

Cambridge University Press

"This book disseminates methodologies that would allow public institutions to implement practices, consistent with values of ethics, rigor, transparency and accountability to promote accountable public sector managers and discusses the processes of control and risk management

and stress their importance for the reliability of financial reporting"--

Understanding Public Management
Emerald Group Publishing

What does it take to build and sustain effective government institutions? What have we learnt about the attempts to design and redesign public sector institutions in different countries? What works and what doesn't, and why? This book intends to answer these questions and presents analytical tools essential in planning for institutional reform,

The Private Sector in Public Office Chandos Publishing

This book discusses blockchain technology and its potential applications in digital government and the public sector. With its robust infrastructure and append-only record system, blockchain technology is being increasingly employed in the public sector, specifically where trustworthiness and security are of importance. Written by leading scholars and practitioners, this edited volume presents challenges, benefits, regulations, frameworks, taxonomies, and applications of blockchain technology in the public domain. Specifically, the book analyzes the implementation of blockchain technologies in the public sector and the potential reforms it would bring. It discusses emerging technologies and their role in the implementation of blockchain technologies in the public sector. The book details the role of blockchain in the creation of public value in the delivery of public sector services. The book analyzes effects, impacts, and outcomes from the implementation of blockchain technologies in the public sector in select case studies. Providing up-to-date information on important developments regarding blockchain in government around the world, this volume will appeal to academics, researchers, policy-makers, public managers, international organizations, and technical

experts looking to understand how blockchain can enhance public service delivery.

The New Public Governance Routledge

Offering insights for public management into a murky, often complex research area, this book provides a new theoretical and practical approach for the analysis and interpretation of the intersection between identity and public enterprises and services. Public Sector Entrepreneurship and the Integration of Innovative Business Models World Bank Publications

What motivates public employees to work hard? This Element systematically reviews answers from public administration research.

The authors locate this research in a novel two-dimensional typology, which shows that public employees can be motivated for other- and self-interested reasons and extrinsic (motivated by outcomes) and intrinsic (motivated by work itself) reasons. Public administration research sheds significant light on extrinsic motivators: working hard to help society (public service motivation), one's organization (organizational commitment) and oneself (financial incentives). Future research should focus on hitherto understudied motivators: symbolic rewards and intrinsic motivators, such as enjoyable work tasks, warm glow, and relatedness with colleagues. Supplementary material for this Element is available online.

The New Public Leadership Challenge Cambridge University Press

In this book readers will find technological discussions on the existing and emerging technologies across the different stages of the big data value chain. They will learn about legal aspects of big data, the social impact, and about education needs and requirements. And they will discover the business perspective and how big data technology can be exploited to deliver value within different sectors of the economy. The book is structured in four parts: Part I

“ The Big Data Opportunity ” explores the value potential of big data with a particular focus on the European context. It also describes the legal, business and social dimensions that need to be addressed, and briefly introduces the European Commission ’ s BIG project. Part II “ The Big Data Value Chain ” details the complete big data lifecycle from a technical point of view, ranging from data acquisition, analysis, curation and storage, to data usage and exploitation. Next, Part III “ Usage and Exploitation of Big Data ” illustrates the value creation possibilities of big data applications in various sectors, including industry, healthcare, finance, energy, media and public services. Finally, Part IV “ A Roadmap for Big Data Research ” identifies and prioritizes the cross-sectorial requirements for big data research, and outlines the most urgent and challenging technological, economic, political and societal issues for big data in Europe. This compendium summarizes more than two years of work performed by a leading group of major European research centers and industries in the context of the BIG project. It brings together research findings, forecasts and estimates related to this challenging technological context that is becoming the major axis of the new digitally transformed business environment.

Institutional Reforms in the Public Sector
American Marketing Association

A broad-ranging and highly intelligent account of key recent developments internationally which skillfully updates the public management and governance literatures - Ewan Ferlie, Royal Holloway

Public management has been radically changed and reformed... this book gives students a fine introduction to these changes

and to the theories dealing with them - Jørgen Grønnegaard Christensen, University of Aarhus An introduction and guide to the dramatic changes that have occurred in the provision of public services over the last two decades, this book combines theoretical perspectives with a range of case studies from Europe, North America and further afield to explain why, how and with what success liberal democracies have reformed the service role of the state. The book pays close attention to four major dimensions of this transition: " External challenges and opportunities: globalisation and EU integration " Reducing the role of the state: Liberalisation, privatisation, regulation and competition policy " Improving the role of the state: New Public Management, e-Government and beyond " Managing the New Public Sector: organisations, strategy and leadership This text is designed for undergraduate courses in public governance, but it also addresses the core components of MPA programmes - the parameters, tools, principles and theories of public sector reform.

Behavioural Public Policy Emerald Group Publishing

Addresses issues relevant to an understanding of the innovation journeys on which public organizations have embarked. If public innovation is defined as a necessary condition for establishing meaningful interactions between the government and society what are the relevant issues that may explain successful processes and forms of public innovation?

Innovation in the Public Sector Springer

GovTech Maturity Index Routledge

While private, for-profit businesses have typically been the most experienced with entrepreneurship, the study of public sector business models is coming to the forefront of entrepreneurial discussions. This shift has allowed researchers and practitioners to expand on their knowledge of positive business choices and paved the way for more profitable business empires. Public Sector Entrepreneurship and the Integration of Innovative Business Models is a comprehensive source of academic research that discusses the latest entrepreneurial strategies, achievements, and challenges in public sector contexts. Highlighting relevant topics such as public management, crowdsourcing, municipal cooperation, and public sector marketing, this is an ideal resource for managers, practitioners, researchers, and professionals interested in learning more about public sector business ideals, and how these models are shaping positive entrepreneurial communities around the world.

Public Sector Strategy SAGE

The GovTech Initiative was launched in 2019 to assist practitioners in the design of new digital transformation projects. The GovTech Maturity Index measures the maturity of four GovTech focus areas: supporting core government systems, enhancing service delivery, and mainstreaming citizen engagement and GovTech enablers.

Research in Accounting in Emerging Economies

Edward Elgar Publishing

Examines how the private sector in China manages to grow without secure property rights.

Canadian Public Administration IOS Press

The effects of recent economic and financial crises have reached an international scale; a number of different nations have experienced the fallout of these events, calling into question issues of accountability and reform in public management. Global Perspectives on Risk Management and Accounting in the Public Sector is a pivotal

reference source for the latest research on current developments and future directions of the regulation, financial management, and sustainability of public institutions.

Featuring discussions on risk assessment, transparency, and information disclosure, this book is ideally designed for regulatory authorities, researchers, managers, and professionals working in the public domain.

Business Lobbying in the European Union IGI Global

An overview of experimental research and methods in public management, and their impact on theory, research practices and substantive knowledge.

The Public Sector Palgrave Macmillan

The Third Edition of this successful textbook introduces students to the major concepts, models, and approaches surrounding the public sector. Now fully updated to include coverage of the New Public Management (NPM), The Public Sector is the most comprehensive textbook on theories of public policy and public administration. The Public Sector is introduced within a three-part framework: public resource allocation, redistribution and regulation. Jan-Erik Lane explains the basic concepts of each of these broad areas, and goes on to examine their consequences for various approaches to the making and implementation of public policy. The book explores models of management, effectiveness and

International Journal of Public Sector

Management John Benjamins Publishing

State administration in modern industrialized countries is facing major challenges to its basic institutional premises. The changing conditions of the global economy mean that the public sector needs to develop far-reaching strategies for innovation. A fundamental reform of the public sector is thus one of the most urgent issues on the international agenda. The volume examines and compares trends, issues and experiences of this reform process in Sweden and Germany.

Journal of Public Policy and Marketing

Information Science Reference

This is a timely and important contribution on innovation processes within the public sector. Departing from the myth of private equal to entrepreneurial, public equal to bureaucratic paralysis, it offers precious insights into public sector learning, entrepreneurship, of course inertias, and also the trade-offs involved in different management philosophies and performance evaluation methods. It is a rare example of political economy done right. Giovanni Dosi, Sant Anna School of Advanced Studies, Pisa Innovation and entrepreneurship have become the cornerstones for economic growth, jobs and competitiveness in the global economy. However, the burden for generating an innovative economy has fallen on the private sector. Scholars have been remarkably taciturn concerning the role for innovation and entrepreneurship in the public sector has remained strikingly invisible. No more. In *Innovation in Public Sector Services*, the authors assemble a team of leading international scholars in a path breaking study to identify the potential for the public sector in contributing to innovation and entrepreneurship. In particular, the volume introduces an insightful new analytical framework that lays the foundations for transforming a sleepy public sector into a dynamic, innovative and highly effective partner for leadership and change in the global era. Scholars, policy makers and business leaders who think that the public sector is condemned to being a hindrance to innovation and entrepreneurship rather than a leader championing change and competitiveness in a global economy would be well advised to read this important new

book. David B. Audretsch, Indiana University, Bloomington, US and WHU, Germany This groundbreaking book provides new key insights and opens up an important research agenda. The book develops a new taxonomy of the different types of innovation found in public sector services, and investigates the key features and drivers of public sector entrepreneurship. The book contains new statistical studies and a set of six international case studies in health and social services. The research shows that public sector organisations are important innovators in their own right. Economic growth and social development depend on efficient public sector organisations that deliver high quality services, are effectively organised, and have excellent interactions with the private sector, NGOs and citizens. Public sector innovation is complex, invariably involving changes in services, organisational structures, and managerial practices. Essential to successful innovation are the policy entrepreneurs and service entrepreneurs who develop, organise and manage new innovations. This book provides key lessons for these public sector entrepreneurs. *Innovation in Public Sector Services* fills a fundamental gap; explaining the dynamics of innovation and entrepreneurship in public sector services and is of great importance for researchers, academics and students interested in innovation, entrepreneurship and strategy management. It provides a stimulating read for anyone working or interested in health and social services.

Tools, Strategies, and Practices for Modern and Accountable Public Sector Management SAGE Welfare offices usually attract negative descriptions of bureaucracy with their queues, routines, and impersonal nature. Are they anonymous machines

or the locus of neutral service relationships? Showing how people experience state public administration, *The Bureaucrat and the Poor* provides a realistic view of French welfare policies, institutions and reforms and, in doing so, dispels both of these myths. Combining Lipsky's street-level bureaucracy theory with the sociology of Bourdieu and Goffman, this research analyses face-to-face encounters and demonstrates the complex relationship between welfare agents, torn between their institutional role and their personal feelings, and welfare applicants, required to translate their personal experience into bureaucratic categories. Placing these interactions within the broader context of social structures and class, race and gender, the author unveils both the social determinations of these interpersonal relationships and their social functions. Increasing numbers of welfare applicants, coupled with mass unemployment, family transformations and the so-called 'integration problem' of migrants into French society deeply affect these encounters. Staff manage tense situations with no additional resources - some become personally involved, while others stick to their bureaucratic role; most of them alternate between involvement and detachment, assistance and domination. Welfare offices have become a place for 're-socialisation', where people can talk about their personal problems and ask for advice. On the other hand, bureaucratic encounters are increasingly violent, symbolically if not physically. More than ever, they are now a means of regulating the poor.
