Research in Organizational Behavior Routledge

This concise guide looks at the role and implementation of new values in providing businesses with a competitive advantage. The book combines theoretical insights with a strong practical element, featuring a wealth of case studies and linked to an innovative online toolkit to help innovators develop their ideas.

Values and Ethics in Mental Health Universal-Publishers

Risk management is a domain of management which comes to the fore in crisis. This book looks at risk management under crisis conditions in the COVID-19 pandemic context. The book synthesizes existing concepts, strategies, approaches and methods of risk management and provides the results of empirical research on risk and risk management during the COVID-19 pandemic. The research outcome was based on the authors' study on 42 enterprises of different sizes in various sectors, and these firms have either been negatively affected by COVID-19 or have thrived successfully under the new conditions of conducting business activities. The analysis looks at both the impact of the COVID-19 pandemic on the selected enterprises and the risk management measures these enterprises had taken in response to the emerging global trends. The book puts together key factors which could have determined the enterprises' failures and successes. The final part of the book reflects on how firms can build resilience in challenging times and suggests a model for business resilience. The comparative analysis will provide useful insights into key strategic approaches of risk management.

Compilation from Volume 1 to Volume 9 Macmillan International Higher Education

In this book Carola Normann-Tschampel develops an enhanced understanding of the relevance of Value-Based Management (VBM) to management practice in Mittelstand. A theory-practice gap is identified based on a unique overview of the field of research. The empirical investigation focuses on three specifically identified areas of management (strategic decision-making, objectives, attitudes) and uses a specific research approach. The insights gained from taking an interpretive stance towards owner-managers' practical experience provide a valuable basis to further address the overall research gap.

Advances in Abstract Intelligence and Soft Computing Routledge

Global collaboration: Intercultural experiences and learning offers qualitative studies of collaboration processes conducted in globalizing companies based in Denmark and with subsidiaries in Asia. It addresses the specific contexts of collaboration and studies how people with different cultural backgrounds work together, both face-to-face and in the virtual workplace. The authors look at cultural differences that are perceived as troublesome, but they also describe cross-cultural interaction processes that lead to intercultural learning and bridge-building. The book highlights how important it is to develop sensitivity to different cultural perspectives and enhance reflexivity in terms of understanding how one's own culture shapes corporate values and practices. It emphasizes that Western companies active in the fast-growing Asian markets must be open to knowledge exchange in both directions, not only from West to East. The empirical studies are put into theoretical perspective by leading scholars within the research fields of cross-cultural management, international business and international human resource management.

Front-of-Package Nutrition Rating Systems and Symbols Gower Publishing, Ltd.

International Journal of Advanced Remote Sensing and GIS (IJARSG, ISSN 2320 – 0243) is an open-access peer-reviewed scholarly journal publishes original research papers, reviews, case study, case reports, and methodology articles in all aspects of Remote Sensing and GIS including associated fields. This Journal commits to working for quality and transparency in its publishing by following standard Publication Ethics and Policies.

Managing Cultural Diversity in Asia CRC Press

Issues in Industrial Relations and Management: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Management Science. The editors have built Issues in Industrial Relations and Management: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Management Science in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Industrial Relations and Management: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

22nd European Conference on Artificial Intelligence, 29 August - 2 September 2016, The Hague, The Netherlands - Including Prestigious Applications of Artificial Intelligence (PAIS 2016) RED'SHINE Publication. Pvt. Ltd.

This gives me an immense pleasure to announce that 'RED'SHINE Publication, Inc' is coming out with its third volume of peer reviewed, international journal named as 'The International Journal of Indian Psychology. IJIP Journal of Studies' is a humble effort to come out with an affordable option of a low cost publication journal and high quality of publication services, at no profit no loss basis, with the objective of helping young, genius, scholars and seasoned academicians to show their psychological research works to the world at large and also to fulfill their academic aspirations.

Issues in Industrial Relations and Management: 2013 Edition Edward Elgar Publishing

This Companion provides an authoritative overview of how cultural diversity is managed in Asia. Although the Asian context appears at first sight to be irreconcilably divergent in terms of diversity management approaches, the contributing authors seek to explore

thematic and geographical demarcations of the notions of cultural diversity and equality at work. Managing Cultural Diversity in Asia not only examines cultural diversity management in a particular geography but also makes a distinct contribution to the wider theory of managing diversity and equality by revealing the significance of context, time and place in framing policies and practices of management. With empirical and conceptual contributions from eminent scholars from across the Asian continent as well as the Asian diaspora, this volume highlights practices of equality and diversity management in settings across Asia and reveals the key drivers and implications of such practices. This important and path-breaking Companion will be an invaluable resource for both undergraduate and research-based postgraduate students on international and comparative human resource management, employment relations and industrial relations courses.

Indian Culture and Work Organisations in Transition Walter de Gruyter GmbH & Co KG

The fundamental motivation of this book is to contribute to the future advancement of Asset Management in the context of industrial plants and infrastructures. The book aims to foster a future perspective that takes advantage of value-based and intelligent asset management in order to make a step forward with respect to the evolution observed nowadays. Indeed, the current understanding of asset management is primarily supported by well-known standards. Nonetheless, asset management is still a young discipline and the knowledge developed by industry and academia is not set in stone yet. Furthermore, current trends in new organizational concepts and technologies lead to an evolutionary path in the field. Therefore, this book aims to discuss this evolutionary path, starting first of all from the consolidated theory, then moving forward to discuss: • The strategic understanding of value-based asset management in a company; • An operational definition of value, as a concept on the background of value-based asset management; • The identification of intelligent asset management, with the aim to frame a set of "tools" recommended to support the asset-related decision-making process over the asset lifecycle; • The emergence of new technologies such as cyber physical systems and digital twins, and the implications of this on asset management.

On the Emergence and Understanding of Asian Global Leadership SAGE

Today, there are few in senior management positions who can afford to ignore modern information technology, and few individuals who would prefer to be without it. Modern IT is key to organizational performance; yet we often assume the benefits will occur without forethought or effort. As managerial tasks become more complex, so the nature of the required information systems changes – from structured, routine support to ad hoc, unstructured, complex enquiries at the highest levels of management. If taken for granted, serious implications can arise for organizations. This fifth edition of Strategic Information Management has been brought fully up to date with recent developments in the management of information systems, including digital transformation strategy, the issues surrounding big data and algorithmic decision-making. The book provides a rich source of material reflecting recent thinking on the key issues facing executives, drawing from a wide range of contemporary articles written by leading experts in North America, Europe, and Australia. Combining theory with practice, each section is fully introduced, includes further reading and questions for further discussion. Designed for MBA, master's level students, and advanced undergraduate students taking courses in information systems management, it also provides a wealth of information and references for researchers.

Questioning the Moral Foundations of Management IGI Global

During the past decade, tremendous growth has occurred in the use of nutrition symbols and rating systems designed to summarize key nutritional aspects and characteristics of food products. These symbols and the systems that underlie them have become known as front-of-package (FOP) nutrition rating systems and symbols, even though the symbols themselves can be found anywhere on the front of a food package or on a retail shelf tag. Though not regulated and inconsistent in format, content, and criteria, FOP systems and symbols have the potential to provide useful guidance to consumers as well as maximize effectiveness. As a result, Congress directed the Centers for Disease Control and Prevention (CDC) to undertake a study with the Institute of Medicine (IOM) to examine and provide recommendations regarding FOP nutrition rating systems and symbols. The study was completed in two phases. Phase I focused primarily on the nutrition criteria underlying FOP systems. Phase II builds on the results of Phase I while focusing on aspects related to consumer understanding and behavior related to the development of a standardized FOP system. Front-of-Package Nutrition Rating Systems and Symbols focuses on Phase II of the study. The report addresses the potential benefits of a single, standardized front-label food guidance system regulated by the Food and Drug Administration, assesses which icons are most effective with consumer audiences, and considers the systems/icons that best promote health and how to maximize their use.

Theory and Practice Routledge

Global projects bring many advantages and challenges. Cultural Imperatives in Perceptions of Project Success and Failure is one of the few, if not the first, reports of research that examines the interaction of culture and views of project success in a comprehensive way. In this highly complex issue, the authors lay out their research and results in a logical, deliberate manner that does much to ease the way along the path to understanding. There is much to be learned by all in the study background and the data analysis itself.

ScholarlyEditions

In the challenging digital economy, bridging the gap between the external stakeholder and business entities through effective applications of technology carries more importance than ever before. By building a strong online presence and maintaining a long-lasting relationship with valuable customers through high-quality customer experience, companies continue to thrive during this digital age. The Handbook of Research on Technology Applications for Effective Customer Engagement is a pivotal reference source that provides vital research on the utilization of the best research practices for consumer satisfaction and loyalty. While highlighting topics such as target marketing, consumer behavior, and brand equity, this publication explores the applications of modern technology in marketing as well as recent business activities of international companies. This book is ideally designed for business professionals,

practitioners, marketers, advertisers, brand managers, retailers, managers, academics, researchers, and graduate-level students.

Organizations and Management in Cross-Cultural Context HCTL Open Publications Solutions, India

This book analyses key theoretical influences on Indian culture in a business context. It shows the interactions between indigenous culture and workplace ethics which is increasingly being populated by multinational corporations. It discusses how the Indian workplace has evolved over time as well as retained some managerial practices dating back to the classical traditions of ancient India. It further demonstrates the changes brought about by globalisation, especially through information technology and business process outsourcing industries. This volume will be useful to the scholars and researchers of business and management studies, cultural studies, Asian studies as well as human resource (HR) professionals.

Value-based Leadership in Public Professions Springer Nature

Business Marketing is an academic textbook written from a marketing management perspective. It is about the marketing methods, issues and principles associated with the relationships and interactions between organisations.

ECAI 2016 Springer Nature

Mental health is the one area of health care where people are often treated against their will, with the justification that it is in their own interest. This raises significant ethical questions and value dilemmas; questions of autonomy, human rights, power and treatment. An understanding of how values matter is of vital importance across all disciplines working within the mental health field. This book provides a comprehensive and exploratory text for practitioners, students and all those interested in developing a knowledge of both ethics and the wider framework of values-based practice. It is unique in being fully co-written by authors representing both service user and service provider perspectives. This exciting new text will enable the mental health practitioner to work more co-productively with service users within a humane and just approach to care. With an emphasis on rights-based compassionate care throughout, this book: - Tackles the issues of how mental health is understood through key theoretical debates about mental distress, values and labelling; - Encourages readers to think critically about their understanding of key issues such as recovery, autonomy, power, knowledge, diagnoses and empathy; - Draws on a wide range of case examples and exercises to help readers deepen their knowledge of values-based practice and ethics in mental health.

An Exploration for Practice National Academies Press

"This book provides a sound understanding of the managerial implications of communities of practice as well as their opportunities and limits for knowledge management"--nota del editor.

Values-Based Innovation Management Taylor & Francis

Artificial Intelligence continues to be one of the most exciting and fast-developing fields of computer science. This book presents the 177 long papers and 123 short papers accepted for ECAI 2016, the latest edition of the biennial European Conference on Artificial Intelligence, Europe's premier venue for presenting scientific results in AI. The conference was held in The Hague, the Netherlands, from August 29 to September 2, 2016. ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems (PAIS) 2016, and the Starting AI Researcher Symposium (STAIRS). The papers from PAIS are included in this volume; the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications (FAIA) series. Organized by the European Association for Artificial Intelligence (EurAI) and the Benelux Association for Artificial Intelligence (BNVKI), the ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI. This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field.

Just-in-Time Logistics Springer Science & Business Media

In the twenty-first century, it is necessary for Asia to step up and assume a larger leadership role on the global stage, commensurate with its economic weight and interests. Eighty-eight percent of the increase in the numbers of the middle class in the next five years will take place in Asia, underscoring the reality that global business and leadership will be colored in significant ways by Asian values, approaches and strategies. This book explores how this may impact our view and conceptual approach to the notion of global leadership. The contributors to this collection explore and examine the concept of global Asian leadership and outcome implications at the societal, corporate and policy-making level. They argue that global leaders will increasingly focus on specific needs, values and strategies that are uniquely Asian, which emphasizes the reality that we most likely will have to redefine our notion of global leadership. This comprehensive study of the integration of Asian and global leadership will benefit those employed in the corporate, government and educational sectors as well as a broader audience with an interest in leadership, policy-making and economics.
