A blueprint for creating sustainable businesses, emphasizing the power and potential of cooperative models "[An] important take on achieving a cleaner and safer world. . . . [Scanlan] envisions a future where green policies go hand-in-hand with worker empowerment, and provides a detailed blueprint for how to get there. . . . Her book offers essential hope that we can yet save ourselves . . . from ourselves."--Bill Lueders, *The Progressive*, "Favorite Books of 2021" Drawing on both her extensive experience founding and directing social enterprises and her interviews with sustainability leaders, Melissa Scanlan provides a legal blueprint for creating alternate corporate business models that mitigate climate change, pay living wages, and act as responsible community members, including Certified B Corps and benefit corporations. With an emphasis on cooperatives, this book reveals the power and potential of cooperating as a unifying concept around which to design social enterprise achieving triple bottom-line results: for society, the environment, and finance.

Market research guide to the outsourcing and offshoring industry a tool for strategic planning, competitive intelligence, employment searches or financial research. Contains trends, statistical tables, and an industry glossary. Over 300 one page profiles of Outsourcing Offshoring Industry Firms - includes addresses, phone numbers, executive names.

Communities of Practice at the World Bank IGI Global
The war in Ukraine has highlighted Europe's urgency to diversify its energy supplies and reduce dependence on Russia. While, in such context, energy

security has become a top political priority for Europe, energy resources from the Middle East and North Africa (MENA) region have drawn European countries' renewed attention. Boasting abundant oil and gas reserves, the MENA region will likely play a leading role in Europe's current energy crisis. While MENA exporters' ability to increase their supply is limited in the short-term, more resources are likely to be available in a longer-term perspective. As Europeans are scrambling for alternatives, this Report analyses the different implications for a number of MENA exporters of fossil fuels. As these countries have become even more central to Europe's energy security, assessing their prospects is of paramount importance, including not only their short-term role as suppliers of fossil fuels, but also their opportunity to accelerate along the path of the green transition. How is the current energy crisis affecting the role of MENA hydrocarbons producers as Europe's energy suppliers? How will Europe's needs in additional resources redefine energy geopolitics in the Middle East and North Africa? Which new prospects for their green transition?

Paradigm Wars Intl Food Policy Res Inst
Beyond the Bottom Line: Integrating the UN Global Compact into Management Practice is the first book to look at how the Ten UN Global Compact Principles and the sustainability agenda can be incorporated into business practice. The UN Global Compact is the largest corporate sustainability initiative and, with over 12,000 participating organizations, provides a major influence on global business sustainability practices. Its mission is to guide organizations in how to (1) do business responsibly by aligning their strategies and operations with Ten Principles on human rights, labour, environment and anti-

corruption; and (2) take strategic actions to advance broader societal goals, such as the UN Sustainable Development Goals, with an emphasis on collaboration and innovation. This new book addresses head-on some of the most persistent managerial challenges faced by businesses and organizations today. To what extent are businesses able to practice responsible management with regard to the Ten Principles of the UN Global Compact? How can managers of organizations comprehensively and pragmatically address the risks and responsibilities concerning these complex and changing issues in their policies and practice? It also offers a platform for academics to confront some of the most intriguing intellectual challenges on this topic.

How to Avoid a Climate Disaster
CRC Press

With an ever-growing majority of the world's human population living in city spaces, the relationship between cities and nature will be one of the key environmental issues of the 21st Century. This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically. Rather than considering cities as wholly separate from nature, a running theme throughout the book is that cities, and city dwellers, should be characterized as intrinsic in the creation of specifically urban-generated 'socio-natures'.

InfoWorld Taylor & Francis
Covers things from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil field services and engineering. This title includes topics such as coal, natural gas and LNG. It includes statistical tables that cover topics ranging from energy consumption, production and reserves to imports, exports and prices.

Human Development Report 1997
Berrett-Koehler Publishers
For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Financing for Gender Equality
Plunkett Research, Ltd.
Rwanda is a recognized leader in the region and in the world in terms of women's empowerment. However, no country has yet achieved full gender equality, resulting in untapped potential. The findings from the Women's Empowerment in Agriculture Index (WEAI) baseline survey conducted in 2019 for the Ministry of Agriculture and Animal Resources (MINAGRI), indicated that women and men in Rwanda both have relatively high levels of empowerment across different agricultural do mains, and most women are as empowered as men in their households. This working paper dis cusses the findings further and in the context of MINAGRI's Gender and Youth Mainstreaming Strategy that was also launched in 2019, as well as the Fourth Strategic Plan for Agricultural Transformation (PSTA 4). Key findings include the following.

• Compared to other countries in the region, women in Rwanda have relatively greater access to financial services and a relatively lower time burden in agriculture. • However, when compared to men in Rwanda, inequalities persist. Women are significantly less likely than men to access financial services, participate in the marketing of agricultural commodities, access extension services, and spend their time on productive (rather than reproductive) work. By adapting and promoting innovative and gender-inclusive financial products, shifting gendered cultural norms, providing extension to both the household head and the spouse, and investing in time-saving technologies and innovations, there are opportunities to reduce the gender gap in agriculture and increase agricultural productivity. Realization of these outcomes will depend partly on the implementation of the Gender and Youth Mainstreaming Strategy and PSTA 4, and partly on coordination with other gender-transformative programs in Rwanda.

Handbook of Cities and the Environment Plunkett Research, Ltd.
Offering an in-depth examination into sustainable energy sources, applications, technologies and policies, this book provides real-world examples of ways to achieve important sustainability goals. Themes include program assessment, energy efficiency, renewables, clean energy and approaches to carbon reduction. Included are a compiled set of chapters discussing the various international strategies and policies being planned and implemented to reduce energy use, impact carbon emissions and shift towards alternative energy sources. Taking an international perspective, contributors from the U.S., Canada, Trinidad and Tobago, Peru, Hungary, Spain, Iran, Ukraine, Jordan, the UAE, Nigeria, South Africa, India, China and Korea, offer their views of energy issues and provide detailed solutions.

These can be broadly applied by engineers, scientists, energy managers, policy experts and decision makers to today's critical energy problems.

Energy Politics in the Mena Region
Yale University Press

#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

International Solutions to Sustainable Energy, Policies and Applications Oxford University Press

In this powerful exploration of worldviews in transition, Mark Woodhouse examines current controversies in the quest for an integrative vision of reality. These include alternative medicine, holistic education, spiritual healing, and ecofeminism, as well as reincarnation, the New Physics,

extraterrestrial visitations, and personal growth. In the Appendix, Fred Mills contributes a pioneering study of sacred geometry.

Bankable Leadership BPP Learning Media

Comparative Company Law provides a systematic and coherent exposition of company law across jurisdictions, augmented by extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.

Faith, Secularism, and Humanitarian Engagement: Finding the Place of Religion in the Support of Displaced Communities Springer Nature

This collection of essays

addresses the glaring gap between policy commitments and actual investments in gender equality, ranging across sectors and focusing on development aid, peace-building and climate funds. Casting a spotlight on the application of gender-responsive budgeting in public budgetary policies, systems and processes, the contributions to this volume explore the chequered trajectories of these efforts in Africa, the Asia-Pacific, Latin America and Andalucía. Critiquing systems of finance, from adherence to neo-liberal macroeconomic fundamentals which prioritise fiscal austerity, the book makes a compelling case for reframing and re-prioritizing budgets to comply with human rights standards, with a particular view to realizing women's rights. The authors highlight the paltry funding for women's rights organizations and movements and examine the prospects for making financing gender responsive. The specific policy, strategy and technical recommendations and the connections across silos which articulate the authors' suggested operational levers will appeal to researchers, practitioners, students, policymakers, gender equality and human rights activists alike.

Corporate Social Responsibility and Opportunities for Sustainable Financial Success Springer

Illustrated by the experience of the World Bank, this book explains how knowledge management, traditionally viewed as being about information systems and processes, can play a fundamental corporate role by creating a competitive edge for organizations, increasing team performance, and fostering effective, large-scale organizational change. Rich and powerful stories, told by economic development practitioners and knowledge management specialists throughout the World Bank, describe the strategies, instruments, tools, and processes at the core of one

of the most important and radical reorganizations of the world's premier international development institution. Going far beyond other knowledge management titles, this book: shows how knowledge management can be a source of competitive advantage and team performance, rather than a back-room support function focuses on the role of the "software" of knowledge management, most notably the use of communities, culture, and collaboration across internal silos to create value; and demonstrates the role that knowledge management can play in fostering innovation, and development of new business lines and strategies by global teams in diverse locations

Written not only for knowledge management professionals, but also for C-suite executives and middle managers who will see the benefits of bringing knowledge management to the core of organizational performance and competitive advantage, the book provides practical examples that can be replicated in other large global knowledge, financing, and development institutions and that will be relevant for public, private, and non-profit organizations.

New York Court of Appeals. Records and Briefs. Springer

In the interests of globalization, many companies today are establishing theories and practices for international management accounting. This book discusses the current status of international management accounting in Japan through interviews with three

major electronics companies. By tracing the history of the business expansion of the three companies, as well as their transition of strategies and accompanying organizational structure, key features and details of international management accounting are faithfully described. The book is divided into two parts. Part I describes general concepts of international management accounting in global companies, while Part II analyzes the experiences of three leading electronics companies ? Matsushita, Sharp and Sanyo ? in international management accounting. Written in a scholarly yet accessible manner, this book will benefit both academics and industry professionals practising in the field.
