Cooperative Tractor Catalog
This book begins with the story of how one American family found their own way into being part of the national pre-occupation with Soviet aggression during the 1950s. They acquired their own bomb-shelter in the form of a 1500-foot long underground tunnel. This tunnel was bored into a mountainside in central Nevada USA for the purpose of mining radio-active Uranium ore. The general idea was that everyone went underground before a nuclear attack. After some time went by, they would then all emerge out into the bright sunshine; start everything back up again; put the coffee on and life would be good...minus the evil Soviet Union! There were so many deadly rattlesnakes in the area, they even considered sending a few of them in to the authorities along with the Uranium orders, just to liven things up a bit! Maybe just the threat of dropping a whole bomb-load of angry rattlesnakes on the Russians would have been enough! Who knows! Before this Nevada adventure they had been gold mining in the snow-filled, rugged mountains of Idaho State. This saga also included, at one point, having to be rescued by the US Airforce! Even before all of that occurred, the head of the family had spent 10 years in Alaska as a mining man and a bush pilot. The whole chapter of his Alaskan arctic adventures reads almost like something out of an Errol Flynn movie! The family then moved to the isolated and remote interior of British Columbia, Canada, where a whole new endeavour in placer- gold mining and pioneer living, was begun. Airplanes and bush pilots became a big part of those stories, as well! This book was written by the oldest son of the family and contains first-hand, exciting, informative and entertaining glimpses into a way of life in North America that is rapidly disappearing. Hopefully, for the older readers, these stories will surely bring back vibrant memories of their own past adventures and for the younger readers, this book will be a call to action to find and live their own dreams. Through it all, this family definitely had their share of: Rattlesnakes, Airplanes and Gold
Official Tractor and Farm Equipment Manual
Designed to equip leaders, supervisors, and managers in understanding and supporting those experiencing a personal crisis, Through the Storm offers invaluable and pragmatic leadership advice. Providing a practical guide to understanding trauma and the various distress reactions that are common responses of those whose lives have been turned upside down, the book applies the author’s professional expertise as a Critical Incident Program Coordinator in an urban police service and draws on his personal success in managing life’s rigors as a cancer survivor and as one who has overcome life-threatening explosions, the deaths of loved ones, and the murder of a close family member. Through the Storm provides readily applied suggestions and strategies on how to engage with individuals during what may be their darkest hour. Whether you are a leader wanting to do the right thing or an individual caught in the moments when “things go bad” and looking for a strategy to get to the other side, this book will be invaluable.
