The Culture of Diagram is about visual thinking. Exploring a terrain where words meet pictures and formulas meet figures, the book foregrounds diagrams as tools for blurring those boundaries to focus on the production of knowledge as process. It outlines a history of convergence among diverse streams of data in real-time: from eighteenth-century print media and the diagrammatic procedures in the pages of Diderot's Encyclopedia to the paintings of Jacques-Louis David and mathematical devices that reveal the unseen worlds of quantum physics. Central to the story is the process of correlation, which invites observers to participate by eliciting leaps of imagination to fill gaps in data, equations, or sensations. This book traces practices that ran against the grain of both Locke's clear and distinct ideas and

Newton's causality—practices greatly expanded by the calculus, probabilities, and protocols of data sampling. Today's digital technologies are rooted in the ability of high-speed computers to correct errors when returning binary data to the human sensorium. High-tech diagrams echo the visual structures of the Encyclopedia, arraying packets of dissimilar data across digital spaces instead of white paper. The culture of diagram broke with the certainties of eighteenth-century science to expand the range of human experience. Speaking across disciplines and discourses, Bender and Marrinan situate our modernity in a new and revealing light.

Looking at media coverage of three very prominent murder cases, Murder Made in Italy explores the cultural issues raised by the murders and how they reflect developments in Italian civil society over the past 20 years. Providing detailed descriptions of each murder, investigation, and court case, Ellen Nerenberg addresses the perception of lawlessness in Italy, the country's geography of crime, and the generalized fear for public safety among the Italian population. Nerenberg examines the fictional and nonfictional representations of these crimes through the lenses of moral panic, media spectacle, true crime writing, and the abject body. The worldwide publicity given the recent case of Amanda Knox, the American student tried for murder in a Perugia court, once more drew attention to crime and punishment in Italy and is the subject of the epilogue.

This is a memoir with a difference, Its author, Air Marshal Sir Peter Horsley, was deprived in his earliest years of both parents. The youngest by several years of a family of seven, he has what he himself describes as 'a miserable start'. Though given a traditional middle-class upbringing through the generosity of relations, his restless spirit led him to leave school and go to sea, living a tough life as a cross between a cadet and a deck hand before escaping once again- on this occasion to join the Royal Air Force on the outbreak of war in 1939. While Peter Horsley's career in the RAF necessarily forms

much of the backcloth to his story there is so much more here besides. He sees his life as a house, each room of which marks an incident or period of such intensity that it altered his whole pattern of life thereafter. The corridors between those rooms mark the passage of time. Some of the incidents he describes brought him into great danger and very close to death- as when he survived three days and nights adrift in a rubber dinghy in storm force conditions, having been shot down during a night on the Cherbourg Peninsular and, much more recently, when he and his car were used as the innocent tools in a terrorist gang to bring about the murder of a former officer of the Special Air Service. Others had a deep effect for quite different reasons- such as the seven years in the personal service of Her Majesty the Queen and HRH Prince Philip as Equerry, or his intriguing encounters with psychic phenomena, all true but described in town-to-earth terms which make no attempt to explain the inexplainable. Peter Horsley is an intensely human and sympathetic man and his writing contains many passages of great sensitivity. His description of the storm which so very nearly cost him his life must stand as a classic amongst Second World War stories.
