In this timely study, Ofer Feldman, Sonja Zmerli, and their team of experts shed light on the multiple ways communication affects political behavior and attitudes. Written for students and scholars alike, *The Psychology of Political Communicators* uses

examples from the US, Europe, Asia, and the Middle East to understand the different roles language plays in the conduct of politics, the way in which these roles are performed in various situations in different societies and cultures, and the political outcomes of verbal behavior. This book will be of interest to scholars and students of political psychology and communication studies.

This volume explores the management of conflicts arising from the siting of unwanted projects in the AsiaPacific, a region inadequately explored by the relevant literature. The work includes studies on a variety of locations, including Hong Kong,

Japan, Mainland China, Taiwan, Vietnam, Singapore, and others. Contributions are drawn from several leading scholars intimately familiar with the locations under study, and employ theoretical, comparative, and policybased approaches to analysis of environmental conflict, risk management, and public participation. The editors also provide introductory and concluding sections in which the siting issues under discussion are summarized and contextualized. The result is a collection that serves as an invaluable aid and source of information for policymakers, environmentalists, and scholars of the AsiaPacific and elsewhere.

[Vault Career Guide to the Energy Industry](#) McGraw Hill Professional Business Ethics: Best Practices for Designing and Managing Ethical Organizations, Second Edition focuses on how to create organizations of high integrity and superior performance. Author Denis Collins shows how to design organizations that reinforce ethical behavior and reduce ethical risks using his unique Optimal Ethics Systems Model

that outlines how to hire and train ethical employees, make ethical decisions, and create a trusting, productive work environment. Taking a practical approach, this text is packed with tips, strategies, and real-world case studies that profile a wide variety of businesses, industries, and issues. New to This Edition: Premium Ethical Dilemma videos located in the Interactive eBook challenge students to practice their ethical reasoning and ethical decision-making skills. New case studies tackle complex ethical issues through real-world companies such as the NFL, Wells Fargo,

Exxon Mobil, and Volkswagen. New chapter-opening ethical dilemmas based on real situations allow students to grapple with the grey areas of business ethics. Optimal Ethics System Check-Up surveys summarize the best practices discussed in the chapter to allow students to assess, benchmark, and continuously improve their own organization. Ethics in the News activities profile real-world events such as United Airlines' removal of a passenger on an overbooked flight to challenge students to think critically about how they

would respond in a particular situation. Up for Debate features highlight contentious issues that students encounter in real life (such as Facebook privacy).

Machine Drawing Routledge Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for

non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on offshore oil and gas platforms. It is intended also for non-production personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required.

This course will provide participants a better understanding of the issues faced in all aspects of production operations, with a particular focus on the unique aspects of offshore operations. *Plant Manager Red-Hot Career Guide; 2566 Real Interview Questions* Petrogav International Generation of Electrical Energy is written primarily for the undergraduate students of electrical engineering while also covering the syllabus of AMIE and act as a refresher for the professionals in the field. The subject itself is now rejuvenated with important new developments. With this in view, the book covers conventional topics like load curves, steam

generation, hydro-generation parallel operation as well as new topics like new sources of energy generation, hydrothermal coordination, static reserve reliability evaluation among others.

Rational Choice Theory And Large-Scale Data Analysis

Petrogav International Emerged from the Lewinian tradition of research into organizational behavior, motivation, and change, here is a conceptual but practical way for human resource professionals and others in today's organizations to understand better, more quickly and reliably, what the underlying human problems in their organizations are. The key to

solving organizational problems is in the hands of people, and when people talk about the problems they experience, they are reflecting their values and beliefs. The way to get people to do that is through a style of inquiry called indirect questioning--the Echo approach. Readable, well illustrated with cases and examples, Dr. Cunningham's book will help executives at all levels understand better how people in their organizations are behaving. **How to Land a Top-Paying Power Plant Mechanics Job** CRC Press
