The book deals with the relation between identity, ethics, and ethos in the New Testament. The focus falls on the way in which the commandments or guidelines presented in the New Testament writings inform the behaviour of the intended recipients. The habitual behaviour (ethos) of the different Christian communities in the New Testament are plotted and linked to their identity. Apart from analytical categories like ethos, ethics, and identity that are clearly defined in the book, efforts are also made to broaden the specific analytical categories related to ethical material. The way in which, for instance, narratives, proverbial expressions, imagery, etc. inform the reader about the ethical demands or ethos is also explored.

In "Ethical Judgment," Abraham Edel makes clear the part played by biological and social scientific information in ethical judgment and moral action using psychological, anthropological, and economic materials as well as historical studies. Edel suggests that many controversies in ethical theory have emerged because different ethical theories made

different scientific assumptions. In the almost forty years since his book was first published, life has become more complex and technological change has accelerated, bringing changes to our morality and ethical theory as well as our conduct. If anything, his observations are even more pertinent, compelling us to examine the empirical core of ethical statements. Edel maintains that since our knowledge of social life and history is constantly growing, moral theories and ethical judgments ought to embody the best knowledge available at any point in time. However, because all knowledge and belief is only probable, there is never absolute certainty but only what Edel calls "residual indeterminacy" in human life and knowledge due to complexity and change. Edel lists four factors that form the basis for moral decisions: universal needs (food); perennial aspirations (friendships); central necessary conditions (job security); and critical contingent factors under special circumstances (land reform in a landholder-ruled society). In his new introduction, Edel applies those factors to the present day, discussing societal changes over the past forty years, such as the number of women in the workforce, the impact of the civil rights movement, and the fact that isolationism as a national policy is no longer feasible. "Ethical Judgment" is a recognized classic in the modern study of ethical theory. It will be valuable reading for sociologists, historians, and all scholars interested in the study of ethics and American culture.

William Shakespeare's "Hamlet": A Retelling in Prose

Our generation is connected to virtually anything and everything. All we have to do is tap an icon on our smartphones or tablets or click a button on the Internet and we have instant access to social networks, news, weather, music, games, TV, and movies. E-mail and push notifications keep us constantly informed and track our friends' every status update. We don't miss a thing. Or do we? Have we become so connected that we're disconnected from what's actually important? Is it really so hard to communicate with an unseen God when we text, tweet, and e-mail people we cannot see? Could it be that we're not hungry for Him—we're simply too full from gorging ourselves at a media smorgasbord? Heather Marie Thompson challenges us to take a few moments every day for the next 30 days to think about what truly matters in life. Jesus needs us to connect with Him so that He can save us, but there's no app for that.
