Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

Introduction to Management Science, 2e offers a unique case study approach and integrates the use of Excel. Each chapter includes a case study that is meant to show the students a real and interesting application of the topics addressed in that chapter. This most recent revision has been thoroughly updated to be more "user-friendly" and more technologically advanced. These changes include, a completely new chapter on the art of modeling with spreadsheets. This unique chapter goes far beyond anything found in other textbooks and are based on the award winning methodologies used by Mark Hillier in his own course. The technology package has also been greatly enhanced to include, Crystal Ball 2000 (Professional Edition) a Management Science Online Learning Center, and an Excel add-in called Alver Table for performing sensitivity analysis. Crystal Ball is the most popular Excel add-in for computer simulation and includes OptQuest (an optimizer with simulation) as well as a forecasting module. The Management Science Online Learning Center (website) includes several modules that enable students to interactively explore certain management science techniques in depth. Solver Table is an Excel add-in developed by the author to help perform sensitivity analysis systematically, as well as substantially expanded coverage of computer simulation, including Crystal Ball. We now have two chapters on computer simulation instead of one, where the second chapter features the use of Crystal Ball.all.

Course Overview: Fundamental Managerial Accounting Concepts 6th edition is intended for the managerial accounting course taken primarily by sophomores at both two and four year schools. Adopters of Edmonds' Fundamental Financial Accounting Concepts may be interested in this text for their managerial courses. This book is also a fit for schools moving away from Principles of Accounting texts to splits and/or schools that find their current text to be too encyclopedic and would like a text integrating a more user-oriented perspective.

Title Overview: Fundamental Managerial Accounting Concepts 6th edition by Edmonds/Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting.

Fundamental Managerial Accounting Concepts 6th edition is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build knowledge in stepwise fashion. The authors' goal

is for students to understand the underlying principles of accounting, not just memorize content.

Managerial accounting gives managers the information they need to make decisions for the future. That 's why managerial accounting and cases are a perfect fit because both focus on future decision-making. While textbooks explain concepts and allow students to master problems, cases go above and beyond. Cases challenge students to critically examine the facts, analyze alternatives from a quantitative and qualitative perspective, and make recommendations. Canadian Managerial Accounting Cases presents cases on a variety of topics at either an introductory or intermediate level of difficulty. There is at least one case on each topic in a typical managerial accounting textbook so that instructors can use the case method throughout their course. Cases are a great way to support learner-centered teaching. Classes become a forum for instructors and students to go beyond lectures and problems by discussing and analyzing the case together. Detailed teaching notes help instructors plan their lessons and facilitate in-class discussions. Students are given a framework for analyzing managerial accounting cases, similar to the framework used in the professional accounting exams, as well as questions to help them in their case analysis. These questions vary in the level of detail so students can grow their case analysis skills. Students learning managerial accounting with cases can see how managerial accounting is used in organizations. They ' ll gain experience in examining the facts, analyzing alternatives, and making decisions—all valuable skills no matter where students ' career paths take them.
