Since global warming/climate change is a controversial issue, there are many websites offering contrasting opinions. It is important to look at the source of the website so you know which organizations are involved and learn techniques to evaluate the information presented.

[Overview of Greenhouse Gases | US EPA](#)

Global warming refers to the recent and ongoing rise in global average temperature near Earth's surface. It is caused mostly by increasing concentrations of greenhouse gases in the atmosphere. Global warming is causing climate patterns to change. However, global warming itself represents only one aspect of climate change.

Introduction Global Warming Webquest Epa

such a rise in global temperatures as to prompt claims that 'the pause' had ended. But expert analysts across the world found that wholesale 'adjustments' had been made to the figures in the main surface temperature records, giving an impression that the global temperature trend had been rising much more than was justified by

Introduction. Global warming is the increase of average world temperatures as a result of what is known as the greenhouse effect.

Certain gases in the atmosphere act like glass in a greenhouse, allowing sunlight through to heat the earth's surface but trapping the heat as it radiates back into space. As the greenhouse gases build up in the atmosphere the Earth gets hotter.

[Global Warming: A Very Short Introduction - Very Short ...](#)

Introduction. The global warming controversy primarily concerns what percentage the 20th century increase in surface temperature is attributable to greenhouse gases and what steps, if any, society...
