Introduction to cells | Basic Biology

Living things include many kinds of organisms, from the plants, animals, fungi, and algae that can be readily seen in nature to the multitude of tiny creatures known as protozoa, bacteria, and archaea that can be seen only with a microscope. Living things can be found in every type of habitat on Earth—on land and in lakes, rivers, and oceans. Although all these organisms are very different from one another, they all have two things in common: they are all descended from a single ancient ...
