Proofs and Mathematical Reasoning

Mathematical induction is a technique used to formulate all such proofs. The term recursion refers to a method of defining sequences of numbers, functions, and other objects. The term mathematical induction refers to a method of proving properties of such recursively defined objects. Completing this unit should take you approximately 4 hours.

Grammatically, it is a complete sentence, written in mathematical symbols, with a subject (x) and a predicate (is greater than 10). But the sentence is neither true nor false, since the value of x isn't speci?ed. If $x = 11$, then $x > 10$. This is a TRUE statement.

Discrete Mathematics: Introduction to Mathematical ...

This is hands down the best introduction to logic and mathematical reasoning in my current library. I highly recommend this to anyone who needs to learn the basics of mathematical proofs because the author takes great care to motivate each concept with plenty of

down to earth examples.

Course Introduction The main purpose of this course is to bridge the gap between introductory mathematics courses in algebra, linear algebra, and calculus on one hand and advanced courses like mathematical analysis and abstract algebra, on the other hand, which typically require students to provide proofs of propositions and theorems.
