What is "psycholinguistics"? Inherently,
linguistic communication involves the

resolution of uncertainty over a potentially unbounded set of possible signals and meanings. How can a fixed set of knowledge and resources be deployed to manage this uncertainty? This is the study of language processing. And how can

Introduction to Psycholinguistics - Tutorial work ...

This pairing can go either way. •When people produce a sentence, they use language to encode the meaning that they wish to convey into a sequence of speech sounds. When people understand a spoken sentence, language allows them to reverse the process and decode a speaker's speech to recover the intended meaning.
