There is simply no other textbook as effective in getting students excited about and involved with psychology as Plotnik's exceptional text. Using his hallmark "multimedia on the printed page" approach, Rod Plotnik makes the concepts of psychology come to life! Plotnik's book is far more than just a good read and a compelling presentation--it is also a book written by a teacher committed to helping students master the content of psychology. From the side-by-side visual summaries to the concept reviews, Plotnik's text is designed throughout for student mastery. Professors report that all the important content is covered in the Plotnik book--in a way that "hooks" students and gets them to read on. And Plotnik's commitment to teaching extends into the ancillaries that accompany the text. The activities in the Instructor's Manual are exciting, original, and offer truly innovative ways to get students involved in the concepts of the course. In many of today's psychology classrooms, the printed pages are just the beginning! In this exciting new Sixth Edition, the Learning Links feature references to the exciting NEW text-specific PowerStudy CD-ROM, developed by Rod Plotnik himself, in conjunction with Tom Doyle. Guided by the CD-ROM and the in-text references, students will launch into whole new worlds of interactive learning and exploration.

Plotnik's Fourth Edition captures the excitement of the current research that is going on in the discipline, while still retaining the "classic" studies that are important to careful development of the subject matter. Plotnik adds coverage of new topics such as genetic research, repressed memory syndrome, and many others as well as updating research in every module. Plotnik has revised and updated his text page by page to increase the depth of coverage in key areas - without losing the student focus that made the book work so effectively in its previous edition. Each chapter's opening vignette serves to organize and tie information together as Plotnik moves through major concepts. Each of the module's key topics is covered in a one-, two-, or (very occasionally) four-page spread. By presenting information in these "bite-sized" chunks with fully integrated visuals, Plotnik makes the material more accessible to students and easier to recall.

A textbook treatment of the same psychological problems addressed by self-help books. Weiten (psychology, Santa Clara U.) and Lloyd (psychology, Georgia Southern U.) argue that accurate knowledge of the principles of psychology can help people with adjustment, which they define as the process by which one manages the stresses of everyday life. The material is organized into sections on the dynamics of adjustment, the interpersonal realm, developmental transitions, and mental and physical health.
