Introduction to Research Methods in Education: Punch ...

Research is the cornerstone of any science, including both the hard sciences such as chemistry or physics and the social (or soft) sciences such as psychology, management, or education. It refers to the organized, structured, and purposeful attempt to gain knowledge about a suspected relationship.

The choice of any particular research design, from ontology, through epistemology to methodology and then methods and techniques, involves trade-offs. All of the main research traditions have strengths and weaknesses. The most important aspect of designing your research is what you want to find out.
