Solution (Instructor only): This question lends itself to open ended discussion. A few factors are: (a) Good, technical people in testing. (b) Amicable relationships between testers and developers. (c) Management leadership. 2. The following exercise is intended to encourage you to think of testing in a more rigorous way than you may be used to.

No economic sector nor human activity remains untouched by software testing, yet it remains poorly understood, inefficient and often insufficiently effective, thereby requiring textbooks just such as this. This is an excellent introduction to software testing, covering principles, foundations, techniques and test management.
