Introduction to Stochastic Processes : Gregory F. Lawler ...

An introduction to stochastic processes through the use of R. Introduction to Stochastic Processes with R is an accessible and well-balanced presentation of the theory of stochastic processes, with an emphasis on real-world applications of probability theory in

the natural and social sciences. The use of simulation, by means of the popular statistical

freeware R, makes theoretical results come alive with practical, hands-on demonstrations.

The second mixed raw moment, which is $(E[N(t)N(s)])$, is called the auto-correlation function of the stochastic process. And the acf for Poisson process with parameter

(λ) is $E[N(t)N(s)] = \lambda \min\{s, t\}$, $\int_0^s \int_0^t \lambda e^{-\lambda s} \lambda e^{-\lambda t} ds dt$
