Edition Steven S. Zumdahl, Donald J. DeCoste  
Cengage Learning

Introductory chemistry students need to develop problem-solving skills, and they also must see why these skills are important to them and to their world. Introductory Chemistry, Fourth Edition extends chemistry from the laboratory to the student's world, motivating students to learn chemistry by demonstrating how it is manifested in their daily lives. Throughout, the Fourth Edition presents a new student-friendly, step-by-step problem-solving approach that adds four steps to each worked example (Sort, Strategize, Solve, and Check). Tro's acclaimed pedagogical features include Solution Maps, Two-Column Examples, Three-Column Problem-Solving

Procedures, and Conceptual Checkpoints.

teaching and learning program that gives you and your students critical tools for ensuring a successful introduction to chemistry, including: An atoms-first approach to chemistry: Through an atoms-first approach, used effectively in the previous four editions, students start learning from the building blocks of matter and progress to understanding complex chemistry concepts from a logical point of view and with a deep understanding. Personalized, interactive learning for achieving proficiency of the concepts with MasteringChemistry: Self-paced tutorials guide students through the text's most challenging topics; provide immediate, specific feedback and reinforcement; and present varied content to keep students engaged and on track. An emphasis on core concepts for solving quantitative and qualitative problems: Students get a true understanding of introductory chemistry by using material that presents problem solving and comprehension as complimentary skills, rather than encouraging rote memorization. Features that

demonstrate how relevant chemistry concepts are in students' lives: A number of outstanding features that show chemistry as a fascinating science.

DeCoste"--Preface.

Introductory Chemistry Houghton Mifflin College Division

"This book is for you, and every text feature is meant to help you learn and succeed in your chemistry course. I wrote this book with two main goals for you in mind: to see chemistry as you never have before and to

---

develop the problem-solving skills you need to succeed in chemistry. I want you to experience chemistry in a new way. I have written each chapter to show you that chemistry is not just something that happens in a laboratory; chemistry surrounds you at every moment. Several outstanding artists have helped me to develop photographs and art that will help you visualize the molecular world. From the opening example to the closing chapter, you will see chemistry. My hope is that when you finish this course, you will think differently about your world because you understand the molecular interactions that underlie everything around you. My second goal is for you to develop problem-solving skills. No one succeeds in chemistry-or in life, really-without the ability

to solve problems. I can't give you a one-size-fits-all formula for problem solving, but I can and do give you strategies that will help you develop the chemical intuition you need to understand chemical reasoning"--
