The eighth novel in Cherryh's Foreigner space opera series, a groundbreaking tale of first contact and its consequences... Exhausted from a two-year rescue mission in space, the crew of the starship Phoenix return home to find disaster: civil war has broken out, the powerful Western Association has been overthrown, and Tabini-aiji, its forceful leader, is missing. In a desperate move, paidhi Bren Cameron and Tabini's grandmother Ilisidi, the aiji-dowager, along with with Cajeiri, Tabini's eight-year-old heir, make planetfall and succeed in reaching the mainland. The brilliant and forceful Ilisidi seeks refuge at the estate of an old ally, and Tabini-aiji arrives at the door. As word of Tabini's whereabouts circulates, clans allied with Tabini descend upon the estate, providing a huge civilian presence that everyone involved hopes will deter impending attacks by the usurpers. But as more and more supporting clans arrive, Bren finds himself increasingly isolated, and it becomes clear that both his extremely important report of alien contact in space, and even his life, rest on the shoulders of only two allies: Ilisidi and Cajeiri. Can one elderly ateva and an eight-year-old boy—himself a prime target for assassination—protect Bren, a lone human involved in a civil war that most atevi believe he caused? The long-running Foreigner series can also be enjoyed by more casual genre readers in sub-trilogy installments. Pretender is the 8th Foreigner novel, and the 2nd book in the third subtrilogy.

There is widespread belief in a warm and comforting story which states the horse is a gentle herbivore. What if a Rosetta Stone had been found to unlock the dark secrets of the horse's past? An international multi-million dollar industry serviced by horse whisperers, glossy magazines and popular culture preaches that horses are meek prey animals who fear predators. What if evidence demonstrated horses have slain lions, tigers, pumas, wolves, hyenas and humans? Contemporary writers have successfully airbrushed murderous and meat-eating horses out of literature. What if Shakespeare, Sherlock Holmes and Steve McQueen provided artistic evidence to refute that claim? Thanks to global equestrian amnesia, the crucial role played by horses in recent history has been lost to mankind. What if testimony revealed meat-eating horses had been used to explore the Poles and photographs had been discovered of Tibet's blood-eating horses? Deadly Equines is a revolutionary departure from equestrian romance. It is a fact-filled analysis which reveals how humanity has known about meat-eating horses for at least four thousand years, during which time horses have consumed nearly two dozen different types of protein, including human flesh, and that these episodes have occurred on every continent, including Antarctica. Various sources of corroborating data, including legends, literature, cinema, news stories, scientific reports and eyewitness accounts are presented for the reader's investigation. None of these items had been hidden. They were ignored, misinterpreted or, in some cases, censored. The result is the first exploration of the horse's hidden history, an alternative equestrian world populated by forgotten facts, overlooked evidence and astonishing stories. Amply illustrated, and containing a map of occurrences, this study challenges the reader to develop a new understanding of the horse, one based upon reason, not fantasy.

Over three years have passed since the reappearance of the starship Phoenix, which two centuries before left an isolated colony of humans on the world of the volatile atevi. Since that time, humans have lived in exile on the island of Mospheira; but the unexpected return of the Phoenix has shattered the fragile political balance of these two nearly incompatible races. The twenty-first book in the beloved Foreigner saga continues the adventures of diplomat Bren Cameron, advisor to the atevi head of state. The overthrow of the atevi head of state, Tabini-aiji, and the several moves of enemies even since his restoration, have prompted major changes in the Assassins' Guild, which has since worked to root out its seditious elements—a clandestine group they call the Shadow Guild. With the Assassins now rid of internal corruption, with the birth of Tabini's second child, and with the appointment of an heir, stability seems to have returned to the atevi world. Humans and atevi share the space station in peaceful cooperation, humans and atevi share the planet as they have for centuries, and the humans' island enclave is preparing to welcome 5000 human refugees from a remote station now dismantled, and to do that in unprecedented cooperation with the atevi mainland. In general Bren Cameron, Tabini-aiji's personal representative, returning home to the atevi capital after securing that critical agreement, was ready to take a well-earned rest—until Tabini's grandmother claimed his services on a train trip to the smallest, most remote

and least significant of the provinces, snowy Hasjuran—a move concerning which Tabini-aiji gave Bren a private instruction: protect her. Advise her. Advise her—perhaps. As for protection, she has a trainload of high-level Guild. But since the aiji-dowager has also invited a dangerously independent young warlord, Machigi, and a young man who may be the heir to Ajuri, a key northern province—the natural question is why the dowager is taking this ill-assorted pair to Hasjuran and what on this earth she may be up to. With a Shadow Guild attack on the train station, it has become clear that others have questions, too. Hasjuran, on its mountain height, overlooks the Marid, a district that is part of the atevi nation only in name—a district in which Machigi is one major player, and where the Shadow Guild retains a major stronghold. Protect her? Illisidi is hellbent on settling scores with the Shadow Guild, and her reasons for this trip and this company now become clear. One human diplomat and his own bodyguard suddenly seem a very small force to defend her from what she is setting in motion.

The groundbreaking novel that launched Cherryh's eponymous space opera series of first contact and its consequences It had been nearly five centuries since the starship Phoenix, lost in space and desperately searching for the nearest G5 star, had encountered the planet of the atevi. On this alien world, law was kept by the use of registered assassination, alliances were defined by individual loyalties not geographical borders, and war became inevitable once humans and one faction of atevi established a working relationship. It was a war that humans had no chance of winning on this planet so many light-years from home. Now, nearly two hundred years after that conflict, humanity has traded its advanced technology for peace and an island refuge that no atevi will ever visit. Then the sole human the treaty allows into atevi society is marked for an assassin's bullet. The work of an isolated lunatic? The interests of a particular faction? Or the consequence of one human's fondness for a species which has fourteen words for betrayal and not a single word for love?
