New competitive realities have ruptured industry boundaries, overthrown much of standard management practice, and rendered conventional models of strategy and growth obsolete. In their stead have come the powerful ideas and methodologies of Gary Hamel and C.K. Prahalad, whose much-revered thinking has already engendered a new language of strategy. In this book, they develop a coherent model for how today's executives can identify and accomplish no less than heroic goals in tomorrow's marketplace. Their masterful blueprint addresses how executives can ease the tension between competing today and clearing a path toward leadership in the future.

Imperial Latin epic has seen a renaissance of scholarly interest. This book illuminates the work of the poet Lucan, a contemporary of the emperor Nero who as nephew of the imperial adviser Seneca moved in the upper echelons of Neronian society. This young and maverick poet, whom Nero commanded to commit suicide at the age of 26, left an epic poem on the civil war between Caesar and Pompey that epitomizes the exuberance and stylistic experimentation of Neronian culture. This study focuses on Lucan's epic technique and traces his influence through the Middle Ages and the Renaissance. Martin T. Dinter's newest volume engages with Lucan's use of body imagery, sententiae, Fama (rumor), and open-endedness throughout his civil war epic. Although Lucan's *Bellum Civile* is frequently decried as a fragmented as well as fragmentary epic, this study demonstrates how Lucan uses

devices other than teleology and cohesive narrative structure to bind together the many parts of his epic body. Anatomizing Civil War places at center stage characteristics of Lucan's work that have so far been interpreted as excessive, or as symptoms of an overly rhetorical culture indicating a lack of substance. By demonstrating that they all contribute to Lucan's poetic technique, Martin T. Dinter shows how they play a fundamental role in shaping and connecting the many episodes of the *Bellum Civile* that constitute Lucan's epic body. This important volume will be of interest to students of classics and comparative literature as well as literary scholars. All Greek and Latin passages have been translated.

In republican times, one of Rome's deadliest enemies was King Mithridates of Pontus. In 66 BCE, after decades of inconclusive struggle, the tribune Manilius proposed a bill that would give supreme command in the war against Mithridates to Pompey the Great, who had just swept the Mediterranean clean of another menace: the pirates. While powerful aristocrats objected to the proposal, which would endow Pompey with unprecedented powers, the bill proved hugely popular among the people, and one of the praetors, Marcus Tullius Cicero, also hastened to lend it his support. In his first ever political speech, variously entitled *pro lege Manilia* or *de imperio Gnaei Pompei*, Cicero argues that the war against Mithridates requires the appointment of a perfect general and that the only man to live up to such lofty standards is Pompey. In the section under consideration here, Cicero defines the most important hallmarks of the ideal military commander and tries to demonstrate that Pompey is his living embodiment. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, the incisive commentary will be of particular interest to students of Latin at both AS and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Cicero's prose and discussion of the most recent scholarly thought.

The seventh and penultimate book of the letters of American philosopher George Santayana, covering the years 1941 to 1947 and including letters to such correspondents as Daniel Cory, John Hall Wheelock, Robert Lowell, and others. This penultimate volume of Santayana's letters chronicles Santayana's life during a difficult

time--the war years and the immediate postwar period. The advent of World War II left Santayana isolated in Rome, and the difficulties of wartime travel across borders forced him to abandon plans to move to more agreeable locations in Switzerland or Spain. During these years, Santayana lived in a single room in a nursing home run by the Blue Sisters of the Little Company of Mary in Rome, where, during the winter months, he did much of his writing in bed (wearing well-mended gloves) in order to stay warm. And yet, despite wartime deprivations, illness, and old age (he was 77 in 1941), Santayana was remarkably productive, completing both his autobiography *Persons and Places* and *The Idea of Christ in the Gospels: or God in Man*, and all but completing *Dominations and Powers*. He confided to one correspondent that he had never been more at peace or more happy. The eight books of *The Letters of George Santayana* bring together over 3,000 letters, many of which have been discovered in the fifty years since Santayana's death. Letters in Book Seven are written to such correspondents as his friend and protégée Daniel Cory, his financial manager and heir George Sturgis, and the American poet Robert Lowell. The correspondence with Lowell--which began when the younger writer sent Santayana a copy of his Pulitzer Prize-winning *Lord Weary's Castle*--signals an important new friendship, which became a source of affection and intellectual engagement in Santayana's final years.

This book illustrates the impact that a focus on environmental and social issues has on both de-risking assets and fostering innovation. Including impact as a new cornerstone of the investment triangle requires investors and clients to align interests and values and understand needs. This alignment process functions as a catalyst for transforming organizational culture within an organization and therefore initiates the external impact of the organization, but also its internal transformation, which in turn escalates the creation of impact. Describing how culture is the social glue permeating all disciplines of an organization, the book demonstrates how organizational alignment can be achieved in order to allow strategic speed, innovation and learning, and provides examples of how impact can be achieved and staff mobilized. It particularly focuses on impact investing, impact entrepreneurship, innovation, de-risking asset, green investment solutions and investor movements to counteract climate change and implementing the United Nations Sustainable Development Goals, highlighting culture, communication, and strategy.

Shortly before the beginning of the global financial crisis of 2008 REITs were introduced in several European countries based on their success in mature markets like the US, Australia and some Asian countries. While the history of REITs in Europe has been relatively brief, REITs are well on the way to become an industry standard as a real estate investment financial vehicle not only in Europe but throughout the developed world. This book provides both academics and decision makers an introduction to the economics of REITs beyond tax transparency, an overview of the mature REITs markets, and a closer reflection of the development of different REIT-structures in Europe including the history, regulation and markets of each country.
