created for ourselves is a lie. We are being used. We are the cogs in someone else's plan. Well, friends, I'm here to tell you that your SALARY or hourly rate is the BRIBE they give you to forget your dreams. Are you going to keep sleeping? Are you going to take a different path that freaks you the fuck out? The time to decide is right now. I don't need to tell you the world is falling apart but, do you see what a virus is doing to us humans? Do you know the way each country responds? Do you have toilet paper? I am in no way making an argument for mutiny. I love my country. I wouldn't want to live anywhere else except on a beach with a fishing rod and a never-ending drink, but that's another story. My goal is to open one of your eyes to investing. Hopefully, you will open the other eye! Then maybe with two eyes open, you can create your path. What does this mean for investing? Simple, what goes up must come down. If you are juggling flaming knives, when one is tossed up, another is aimed at you. Now, picture a trusted friend helping you with these flaming knives. Their job is to catch the knives and toss them in cold water to put out the flame. As it turns out, you can do this same thing with flaming stocks and their icy, bitter twins. These types of stocks are played against each other. When one is up, the other is down. Play the downturn loser, not the winner. Why buy the inverse stock that is running up? You probably think it is a done deal. Buy the winner hitting 15% today! Hold till tomorrow..... BUST. Often new traders have timing issues that cause them to enter into a position that suddenly drops after purchase. Instead, watch the inverse stock fall off the face of a cliff. Wait until the RSI is dirty low before buying in. Wait some more on purchasing the inverse until you see the running up stock flip (aka turn red or decrease in gains). The inverse chart will begin to show green tickers on the one day one minute chart. DO NOT PLAY INVERSE ETF'S ON ANYTHING BUT A DAY TRADE. You will

lose everything and be stuck bad holding a L O S E R for a long time. I've done this. Don't do this; it sucks watching a \$100 stock go to \$30. You can cut your losses and take it in the rear. Or bag hold for who knows how long. When investing, you want to wait for the potential purchase to show you its actual value. A Floridian will buy shrimp off of some dude's pickup truck but, we won't dangle our feet off a dock because we know the hidden dangers under the water. Just as in investing, there are dangers you can only see when you truly take the time to look. Or you learn first hand when you get bit in the ass by a stock you had no business buying without a clear cut plan of entry and exit. You must learn to see the stocks for what they are—a shell game.

People wanting basic advice about stocks, bonds, mutual funds, retirement planning, and tax strategies are often frustrated by information overload. Picking the right book seems as daunting as deciding what to do with their savings and investments. *Investing 101: Updated and Expanded* removes both roadblocks, putting people on a path that they can understand and stick with. Kristof is renowned for taking the mystery and anxiety out of investing by keeping choices manageable. Kristof walks readers through the entire investment cycle and the way they think of their financial lives, rather than presenting stand-alone concepts like stocks and real estate. This expanded edition has new information about 529 college savings plans, annuities, Roth IRAs, reverse mortgages, and why declining markets can be good for you. It includes a cautionary look at home mortgages as investments. There's even a portfolio for the lazy investor. Kristof's loyal readership and the success of this book's first edition demonstrate that she understands what's on the minds of investors as intimately as she knows what's happening in financial markets. 1. The stock market has its peculiarities. It's a world where a small matter has the potential of creating a massive impact. One thing added or one thing left out could be the difference between making a million dollars and losing it all. 2. There is no shortage of investors. The world has many of them. And you can be sure that some are extremely successful while others cry bitterly over their losses. 3. The reason why most investors fail is that they approach investing as though it were some lottery game. They

---

are chance-takers. They have no plan. They stagger from one failed investment to another, taking stabs in the dark, and soon enough they lose all their money. 4. This book has been written to help you become an intelligent investor. An intelligent investor is not a chance-taker. An intelligent investor is a vain investor who exploits market inconsistencies long before others have taken notice. 5. You will learn all the basics of the stock market investment and how to optimize your investments and realize the largest possible profits. 6. An investor should not turn himself into a speculator, for a speculator acts on his instincts rather than his intellect when executing trades. 7. The stock market is neither a mythical place beyond human understanding, nor a place reserved for people with special genetics. The investors who have made a fortune out of stock market are average people like everyone else except they took their time to understand everything before trying to get in the game. 8. There are many investments in the securities markets beyond stocks. You could invest in bonds and funds like mutual funds and index funds. 9. Investing in IPOs gives you a chance to own a slice of a company and in return, you play your part in providing the company with much-needed resources. 10. The best single thing an investor can do before taking up an investment deal is to conduct a fundamental analysis. 11. Fundamental analysis is the evaluation of a company's financial health with the intention of either solidifying your interest in the venture or finding out any red flag. "The strategies for succeeding as an investor are timeless. They worked a lifetime ago in the days of Ben Graham (the father of value investing) and they still work today."

LEARN TO EARN "Public companies are everywhere, and they surround you from morning to night. . . . Nearly everything you eat, wear, read, listen to, ride in, lie on, or gargle with is made by one. Perfume to penknives, hot tubs to hot dogs, nuts to nail polish are made by businesses that you can own." —from the Introduction. McDonald's, The Gap, Circuit City, Gillette, CBS, and thousands more . . . anybody can own part of big and small companies. As companies grow and prosper, you can too. Whenever burgers are eaten, sweaters are purchased, batteries are used, and faces are shaved, you've got a piece of the action. From Alexander Hamilton to Warren Buffett, people have been making big money by investing in the corporations and institutions around them. Mutual-fund superstar Peter Lynch and author John Rothchild explain what's not normally taught in high school —how the stock market helps you and how it helps the country. By understanding how and why the stock market works when you buy a share of a company or purchase a mutual fund, you can make informed —and profitable —decisions. Whether you're saving for college, a house, a trip, or retirement, there is no better method to secure a sound financial future than to invest. Young or old, there is no better time to start investing than now. "Investing is fun. It's interesting. It can put you on the road to prosperity for the rest of your life. . . ." Learn to Earn gives you the expert guidance you need to make the right start. Lynch and Rothchild cover the gamut on investment fundamentals and principles, from choosing stocks, to picking a broker, to reading an annual report. Learn to Earn reveals how to decipher the stock pages and how to evaluate the pros and cons of the five basic investment vehicles —savings accounts, collectibles, houses or apartments, stocks, and bonds. Yet, there is much more to investing than just the principles, and there is much more to Learn to Earn than just the fundamentals. Opportunity comes in many forms, from many sources, with many histories. Brimming with stories and parables, Lynch and Rothchild also explain: Why the world as we know it would collapse without investors . . . How capitalism, from the time of the American Revolution on, has shaped the past, and how that affects us today . . . How Coke, Campbell's Soup, Ben & Jerry's, Microsoft, and other big companies got started, who gets rich from them, and how they got that way . . . How to know the real story behind the
