United States Air Force Academy PublishDrive

The chapters included in this volume are composed of some selected contributions from the 8th International Conference of Political Economy (ICOPEC 2017) held in Belgrade on June 28-30, 2017 with the main theme of “Institutions, National Identity, Power, and Governance in the 21st Century”. All chapters are peer-reviewed by both the editors and independent scholars from the fields relevant to the manuscript's subject area. The purpose of the volume is to provide and enhance our understanding of the recent trends in the social, economic and financial analysis. Therefore, this volume includes chapters that focus on the importance of these three disciplines of social sciences which interact heavily with almost every other social science as well as the normative sciences. In this sense, this volume aims at providing a contemporary update to the literature from various different perspectives and tries to contribute to our knowledge in an effective manner. The chapters do not only present analysis of certain topics but also help to build the mindset for further studies that would be helpful in looking for answers to some of the remaining questions in these three crucial social

sciences disciplines. Hence, we are glad to put together a volume that would be useful to a large audience rather than just the technical experts.

LAP Lambert Academic Publishing

National Financial Literacy Test (NFLAT) which is the first national level test to measure and improve the level of financial literacy and basic knowledge among students of class VIII, IX and X. CIMA Official Exam Practice Kit Financial Analysis
Elsevier

Valuation of Internet and Technology Stocks offers practical information on how to value internet and high-tech companies more accurately. The book reviews previous practice, highlights the deficiencies in existing stock market techniques, and shows how to modify or replace them. It also demonstrates how the New Economics necessitates new forms of investment analysis. This book presents new ways of looking, researching and valuing internet and high-tech companies. It explains why there has been a high correlation between high loss companies and a rocketing stock price. It questions whether there is still a place for discounted cash flows when there is no cash flow to discount. It also considers what new methods are available to value super growth companies and whether these methods are any better than existing techniques. Chapters deal with a wide range of topics including: where technology/internet stocks fit in a new economy; how you value traditional

common stocks; application of the Porter model to the valuation of technology/internet stocks; problems with applying traditional valuation models for technology/internet stocks; derivative markets and real options; and the lessons that can be learned by investors from the year 2000 collapse of technology/internet stocks. This text will be of interest to traders, investment managers, institutional investors, plan managers, and finance professionals. * Investigates why there has been a high correlation between high loss companies and a rocketing stock price * Questions whether there is still a place for discounted cash flows when there is no cash flow to discount * Considers what new methods are available to value super growth companies and whether these methods are any better than existing techniques
