Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and

policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban 's backyard Anyone who despairs of the individual 's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan 's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson 's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, *Three Cups of Tea* combines adventure with a celebration of the humanitarian spirit.

An in-depth guide for angel investors and entrepreneurs on early stage investing economics Written by two of Boston's most active and experienced angel investors, *Angel Investing by the Numbers* is a handbook and desk reference for both investors and entrepreneurs looking to better understand the numbers side of angel investing. In the book, we discuss in detail what you should know about the financial mechanics of early stage investing, including how valuation works, what effect it has on returns, and how the companies in your portfolio work together to drive your overall results. Just like the baseball team manager using a MoneyBall approach needs to really understand the statistics of the game, the successful investor employing our approach needs to understand the financial mechanics of investing. Overview of Contents: In this book we will cover important topics such as: 1) How to read, understand and utilize a Capitalization Table 2) How to place a proper value on an early stage company with a limited track record 3) What are some of the different financial pathways that can lead to a successful exit for companies and their angel investors 4) How to construct a portfolio that will improve the likelihood of successful returns 5) What the underlying financial math looks like in a top tier angel portfolio 6) What approaches to use to exercise options and buy restricted stock that minimize taxes and optimize your financial outcome Having a solid understanding of valuations, exit paths and portfolio construction might not sound like as much fun as baseball for many of our readers. But trust us, after investing in startups for a combined 25+ years and 100+ companies, we have learned the hard way and fully embrace the importance of mastering these important topics. Just because finance wasn't a focus in your career doesn't mean you can't understand the financial mechanics of angel investing - which is good because you cannot afford to ignore these realities!

A practical and comprehensive guide to surviving the greatest

disaster of our time, from New York Times bestselling self-help author and beloved CBS Sunday Morning science and technology correspondent David Pogue. You might not realize it, but we're already living through the beginnings of climate chaos. In Arizona, laborers now start their day at 3 a.m. because it's too hot to work past noon. Chinese investors are snapping up real estate in Canada. Millennials have evacuation plans. Moguls are building bunkers. Retirees in Miami are moving inland. In *How to Prepare for Climate Change*, bestselling self-help author David Pogue offers sensible, deeply researched advice for how the rest of us should start to ready ourselves for the years ahead. Pogue walks readers through what to grow, what to eat, how to build, how to insure, where to invest, how to prepare your children and pets, and even where to consider relocating when the time comes. (Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics. Timely and enlightening, *How to Prepare for Climate Change* is an indispensable guide for anyone who read *The Uninhabitable Earth* or *The Sixth Extinction* and wants to know how to make smart choices for the upheaval ahead.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

The traits that make Sam Zell one of the world's most successful entrepreneurs also make him one of the most surprising, enigmatic, and entertaining mavericks in American business. Self-made billionaire Sam Zell consistently sees what others don't. From finding a market for overpriced Playboy magazines among his junior high classmates, to buying real estate on the cheap after a market crash, to investing in often unglamorous industries with long-term value, Zell acts

boldly on supply and demand trends to grab the first-mover advantage. And he can find opportunity virtually anywhere—from an arcane piece of legislation to a desert meeting in Abu Dhabi. "If everyone is going left, look right," Zell often says. To him, conventional wisdom is nothing but a reference point. Year after year, deal after deal, he shuts out the noise of the crowd, gathers as much information as possible, then trusts his own instincts. He credits much of his independent thinking to his parents, who were Jewish refugees from World War II. Talk to any two people and you might get wild swings in their descriptions of Zell. A media firestorm ensued when the Tribune Company went into bankruptcy a year after he agreed to steward the enterprise. At the same time, his razor-sharp instincts are legendary on Wall Street, and he has sponsored over a dozen IPOs. He's known as the Grave Dancer for his strategy of targeting troubled assets, yet he's created thousands of jobs. Within his own organization, he has an inordinate number of employees at every level who are fiercely loyal and have worked for him for decades. Zell's got a big personality; he is often contrarian, blunt, and irreverent, and always curious and hardworking. This is the guy who started wearing jeans to work in the 1960s, when offices were a sea of gray suits. He's the guy who told *The Wall Street Journal* in 1985, "If it ain't fun, we don't do it." He rides motorcycles with his friends, the Zell's Angels, around the world and he keeps ducks on the deck outside his office. As he writes: "I simply don't buy into many of the made-up rules of social convention. The bottom line is: If you're really good at what you do, you have the freedom to be who you really are." *Am I Being Too Subtle?*—a reference to Zell's favorite way to underscore a point—takes readers on a ride across his business terrain, sharing with honesty and humor stories of the times he got it right, when he didn't, and most important, what he learned in the process. This is an indispensable guide for the next generation of disrupters, entrepreneurs, and investors.

Am I Being Too Subtle? John Wiley & Sons

NEW YORK TIMES BESTSELLER "A rollicking good time." —*Golfweek* * "Thoroughly engaging." —*The Washington Post* A juicy and freewheeling biography of legendary golf champion Phil Mickelson—who has led a big, controversial life—as reported by longtime *Sports Illustrated* writer and bestselling author Alan Shipnuck. Phil Mickelson is one of the most compelling figures in sports. For more than three decades he has been among the best golfers in the world, and his unmatched longevity was exemplified at the 2021 PGA Championship, when Mickelson, on the cusp of turning fifty-one, became the oldest player in history to win a major championship. In this raw, uncensored, and unauthorized biography, Alan Shipnuck captures a singular life defined by thrilling victories, crushing defeats, and countless controversies. Mickelson is a multifaceted character, and all his warring impulses are on display in these pages: He is a smart-ass who built an empire on being the consummate professional; a loving husband dogged by salacious rumors; a high-stakes gambler who knows the house always wins but can't tear himself away. Mickelson's career and public image have been defined by the contrast with his lifelong rival, Tiger Woods. Where Woods is robotic and reticent, Mickelson is affable and extroverted, an incorrigible showman whom many fans love and some abhor because of the overwhelming size of his personality. In their early years together on Tour, Mickelson lacked Tiger's laser focus and discipline, leading Tiger Woods to call her son's rival "the fat boy," among other put-downs. Yet as Tiger's career has been curtailed by scandal, addiction, and a broken body, Phil sails on, still relevant on the golf course and in the marketplace. Phil is the perfect marriage of subject and author. Shipnuck has long been known as the most fearless writer on the golf beat, and he delivers numerous revelations, from the true scale of Mickelson's massive gambling losses; to the inside story of the acrimonious breakup between Phil and his longtime caddie, Jim "Bones" Mackay; to the secretive backstory of the Saudi golf league that Mickelson championed to wield as leverage against the PGA Tour. But Phil also celebrates Mickelson's random acts of kindness and generosity of spirit, to which friends and strangers alike can attest. Shipnuck has covered Mickelson for his entire career and has been on the ground at Mickelson's most memorable triumphs and crack-ups, allowing him to take readers inside the ropes with a thrilling immediacy and intimacy. The result is the juiciest and liveliest golf book in years—full of heart, humor, and unexpected turns.

Over 1.5 million Canadians were on relief, one in five was a public dependant, and 70,000 young men travelled like hoboes. Ordinary citizens were rioting in the streets, but their demonstrations met with indifference, and dissidents were jailed. Canada emerged from the Great Depression a different nation. The most searing decade in Canada's history began with the stock market crash of 1929 and ended with the Second World War. With formidable story-telling powers,

Berton reconstructs its engrossing events vividly: the Regina Riot, the Great Birth Control Trial, the black blizzards of the dust bowl and the rise of Social Credit. The extraordinary cast of characters includes Prime Minister Mackenzie King, who praised Hitler and Mussolini but thought Winston Churchill "one of the most dangerous men I have ever known"; Maurice Duplessis, who padlocked the homes of private citizens for their political opinions; and Tim Buck, the Communist leader who narrowly escaped murder in Kingston Penitentiary. In this #1 best-selling book, Berton proves that Canada's political leaders failed to take the bold steps necessary to deal with the mass unemployment, drought and despair. A child of the era, he writes passionately of people starving in the midst of plenty.

"Amy Webb found her true love after a search that's both charmingly romantic and relentlessly data-driven. Anyone who uses online dating sites must read her funny, fascinating book." —Gretchen Rubin, #1 New York Times bestselling author of *The Happiness Project* After yet another disastrous date, Amy Webb was preparing to cancel her JDate membership when epiphany struck: her standards weren't too high, she just wasn't approaching the process the right way. Using her gift for data strategy, she found which keywords were digital-man magnets, analyzed photos, and then adjusted her (female) profile to make the most of that intel. Then began the deluge—dozens of men who actually met her own stringent requirements wanted to meet her. Among them: her future husband, now the father of her child.

The best investment practitioners, the ones who get results, rely not just on their instincts and experience but on the insights of the trailblazers in their field—the people who interpret, challenge, and even devise the strategies and tools that shape investment management. But when you're in the trenches—serving clients and running a business—the voices at the front can have trouble getting through, and you may sometimes wonder if your methods are as current as your clients deserve. Strategies continue to be explored, and tactics can change almost as quickly as the markets. What's the story behind Peter Bernstein's challenge to a fixed-asset-allocation mix? Did the financial-planning community take a wrong ideological turn in espousing it? What can behavioral finance tell you about serving your clients? What choices can you make to ensure tax efficiency in your clients' portfolios? Downside risk measures have come a long way since Markowitz brought them so much attention. But when's the last time you checked into your reward-to-semivariability ratios? How current is your understanding of the core-and-satellite approach to portfolio design? And how much do you know about putting one in place for your client? To get some answers to these and other questions, financial advisers Harold Evensky and Deena B. Katz invited some of the best minds in investment management to share their best thinking. The result is a gathering of eagles that will challenge your beliefs, reinforce your convictions, pique your curiosity, and maybe even improve some of those tried-and-true practices you put in place too long ago. So sit in on this remarkable think tank. Treat yourself to a compelling array of ideas—from the doggedly practical to the delightfully abstract—that will inform and stimulate your own thinking and reawaken the reasons you came to investment management in the first place.

"It's hard to talk clearly about investing and make sense to ordinary readers at the same time. Katsenelson gives a lucid explanation of today's markets with sound advice about how to make money while avoiding the traps that the market sets for exuberant bulls and frightened bears alike." — Thomas G. Donlan, Barron's "A thoroughly enjoyable read. Provides a clear framework for equity investing in today's 'sideways' and volatile markets useful to everyone. Clear thinking and clear writing are not often paired - well done!" — Dick Weil, CEO, Janus Capital Group "The bible for how to invest in the most tumultuous financial market environment since the Great Depression. A true guidebook for how to build wealth prudently." — David Rosenberg, Chief Economist & Strategist, Gluskin Sheff + Associates Inc. "A wonderful, grounded read for new and seasoned investors alike, Katsenelson explains in plain English why volatility and sideways markets are a stock picker's best friend." — The Motley Fool, www.Fool.com Praise for Active Value Investing "This book reads like a conversation with Vitaliy: deep, insightful, inquisitive, and civilized." — Nassim Nicholas Taleb, author of *The Black Swan* "Thoroughly enjoyable . . . for the thoughtful and often entertaining way in which it is delivered. . . Katsenelson takes his reader step by step into the mind of the value investor by relating, in a fictional addendum to *Fiddler on the Roof*, the story of Tevye's purchase of Golde, the cow. He also describes his own big-time gambling evening (he was

willing to lose a maximum of \$40) and that of a half-drunken, rowdy fellow blackjack player to stress the importance of process. He then moves on to the fundamental principles of active value investing. What differentiates this book from so many others on value investing is that it describes, sometimes through the use of case studies, the thinking of a value investor. Not just his models or his metrics but his assessments. Katsenelson is an empiricist who weighs facts, looks for contraindications, and makes decisions. He makes value investing come alive. This may be a little book, but it's packed with insights for both novices and experienced investors. And it is a delight to read." —Seeking Alpha

One snowy day an elderly woman, Sarah, watches children gathering at the bus stop. While they never seem to notice her, she notices them, especially one little boy who has no mittens. That night, Sarah knits the boy a pair of cozy mittens and places them on the blue spruce tree for him to discover. It soon becomes a game, with the children looking for new mittens on the mysterious tree every morning, and Sarah joyfully knitting new ones each night. With its touching message and delightful illustrations, adults and children will enjoy this intergenerational tale for years to come.

Climate change poses many challenges that affect society and the natural world. With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.
