McGraw-Hill/Irwin

The integrated solutions for Bodie, Kane, and Marcus' Investments set the standard for graduate/MBA investments textbooks. The unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. The content places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures, options, and other derivative security markets than most investment texts. Connect is the only integrated learning

system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

The Investor's Monthly Manual
Irwin/McGraw-Hill

The Ninth Edition includes increased attention to changes in market structure and trading technology, while continuing to be organized around one basic theme - that security markets are nearly

efficient. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Ebook: Investments, Global Edition McGraw-Hill Education

The purpose of this book is to help you learn how to manage your money to derive the maximum benefit from what you earn. Mixing investment instruments and capital markets with the theoretical detail on evaluating investments and opportunities to satisfy risk-return objectives along with how investment practice and theory is

influenced by globalization leaves readers with the mindset on investments to serve them well. The material is intended to be rigorous and empirical yet not overly quantitative. We continue with unparalleled international coverage, newly rewritten and reorganized derivatives material to be more intuitive and clearer, three additional chapters on derivatives pricing for those who want more detail, rewritten material on multifactor models of risk and return, and new CFA problems for more practice on computations concerning investment decisions. To manage money and investments, one needs to learn about investment alternatives and develop a way of analyzing and thinking about investments that will be of benefit and allow a foundation as new tools and investment opportunities become available. Reilly/Brown

provide the best foundation, used extensively by professionals, organizations, and schools across the country.

A great source for those with both a theoretical and practical need for investment expertise.
