The market leading undergraduate investments textbook, *Essentials of Investments*, 8e by Bodie, Kane and Marcus, emphasizes asset allocation while presenting the practical applications of investment theory. The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace. The

eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds. *Investment Risk Management* McGraw Hill Efficiently Inefficient describes the key trading strategies used by hedge funds and demystifies the secret world of active investing. Leading financial economist Lasse Heje Pedersen combines the latest research with real-world examples and interviews with top hedge fund managers to show how certain trading strategies make money--and why they sometimes don't. Pedersen views markets as

neither perfectly efficient nor completely inefficient. Rather, they are inefficient enough that money managers can be compensated for their costs through the profits of their trading strategies and efficient enough that the profits after costs do not encourage additional active investing. Understanding how to trade in this efficiently inefficient market provides a new, engaging way to learn finance. Pedersen analyzes how the market price of stocks and bonds can differ from the model price, leading to new perspectives on the relationship between trading results and

---

finance theory. He explores several different areas in depth--fundamental tools for investment management, equity strategies, macro strategies, and arbitrage strategies--and he looks at such diverse topics as portfolio choice, risk management, equity valuation, and yield curve logic. The book's strategies are illuminated further by interviews with leading hedge fund managers: Lee Ainslie, Cliff Asness, Jim Chanos, Ken Griffin, David Harding, John Paulson, Myron Scholes, and George Soros.

theoretical framework around which to build practical knowledge of securities and securities markets. The authors, including a Nobel Prize winner and a full-time practitioner, offer a balanced presentation of theory and practice as they explain to students the essentials of prominent investment concepts. Just as importantly, they illustrate how those concepts are applied by professional investors. The Sixth Edition distills the growing complexity of the investment environment,	enumerating and describing today's various securities and markets in a clear, concise manner and integrating discussions of new investment management techniques.* NEW-Features a new chapter on efficient markets, discussing the notion of market efficiency that underlies much of the current thinking about the world of investing.* NEW-Institutional Issues boxes that illustrate how concepts are applied in the real world. questions about corporate finance, including issues related to derivatives pricing, state-price probabilities, dynamic hedging, dividends, capital structure decisions, and risk and incentive management. Numerical examples are provided, and the mathematics is kept simple throughout. In this second edition, explanations have been improved, based on the authors' experience teaching the material, especially concerning the scope of state-price probabilities in Chapter 12. There is also a new Chapter 22: Fourteen Insights. Principles of Investments McGraw-Hill Education

The integrated solutions for Bodie, Kane, and Marcus' Investments set the standard for graduate/MBA investments textbooks. The unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. The content places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures, options, and other derivative security markets than most investment texts. Bodie Investments' blend of practical and theoretical coverage combines with a complete digital

solution to help your students achieve higher outcomes in the course.
