"An irreverent satirical fantasy about a sudden and violent upheaval.... Think Tom Robbins channeling Jonathan Swift." —David Takami, *Seattle Times*

Adjustment Day is an ingenious darkly comic work in which Chuck Palahniuk does what he does best: skewer the absurdities in our society. Geriatric politicians bring the nation to the brink of a third world war to control the burgeoning population of young males, while working-class men dream of burying the elites. Adjustment Day's arrival makes real the logical conclusion of every separatist fantasy, alternative fact, and conspiracy theory lurking in the American psyche.

Clown Girl lives in Baloneytown, a seedy neighborhood where drugs, balloon animals, and even rubber chickens contribute to the local currency.

Against a backdrop of petty crime, she struggles to live her dreams, calling on cultural masters Charlie Chaplin, Kafka, and da Vinci for inspiration. In an effort to support herself and her layabout performance-artist boyfriend, Clown Girl finds herself unwittingly transformed into a

"corporate clown," trapping herself in a cycle of meaningless, high-paid gigs that veer dangerously close to prostitution. Monica Drake has created a novel that riffs on the high comedy of early film stars — most notably Chaplin and W. C. Fields — to raise questions of class, gender, economics, and prejudice. Resisting easy classification, this debut novel blends the bizarre, the humorous, and the gritty with stunning skill.

Chuck Palahniuk's world has always been, well, different from yours and mine. In his first collection of nonfiction, Chuck Palahniuk brings us into this world, and gives us a glimpse of what inspires his fiction. At the Rock Creek Lodge Testicle Festival in Missoula, Montana, average people perform public sex acts on an outdoor stage. In a mansion once occupied by The Rolling Stones, Marilyn Manson reads his own Tarot cards and talks sweetly to his beautiful actress girlfriend. Across the country, men build their own full-size castles and rocketships that will send them into space. Palahniuk himself experiments with steroids, works on an assembly line by day and as a hospice volunteer by night, and experiences the brutal murder of his father by a white supremacist. With

this new direction, Chuck Palahniuk has proven he can do anything. **BONUS:** This ebook edition includes an excerpt from Chuck Palahniuk's *Doomed*.

The bestselling genre of Frankenfiction sees classic literature turned into commercial narratives invaded by zombies, vampires, werewolves, and other fantastical monsters.

Too engaged with tradition for some and not traditional enough for others, these 'monster mashups' are often criticized as a sign of the artistic and moral degeneration of contemporary culture. These hybrid creations are the 'monsters' of our age, lurking at the limits of responsible

consumption and acceptable appropriation. This book explores the boundaries and connections between contemporary remix and related modes, including adaptation, parody, the Gothic, Romanticism, and postmodernism. Taking a multimedia approach, case studies range from novels like *Pride and Prejudice* and *Zombies* and *The Extraordinary Adventures of the Athena Club* series, to television programmes such as *Penny Dreadful*, to popular visual artworks like Kevin J. Weir's *Flux Machine GIFs*. Megan de Bruin-Molé uses these monstrous and liminal works to show

how the thrill of transgression has been contained within safe and familiar formats, resulting in the mashups that dominate Western popular culture.

Rumor has it that the legendary Head of the Dragon had one last treasure—the plunder of a thousand ports—that for decades has only been a myth, a fool's journey. Xiang is convinced this map could lead to the fabled treasure. Captivated with the thrill of adventure, she joins Anh and her motley crew off in pursuit of the island. But the girls soon find that the sea—and especially those who sail it—are far more dangerous than the legends led them to believe.

Fight Club 3 (Graphic Novel) Random House

In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning,

information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: "bad guys" from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main

characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay "experts on the human soul" for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human

population in the future. Neanderthal methods, it must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this "civilization"—maybe instead of trying to find new recipes to destroy "excess billions" and trying to examine human potential using

would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.
