A sci-fi thrill ride—incredible action, inventive world-building, deadly humor, and more—for fans of movie classics such as Blade Runner and Mad Max! This is the companion to Invisible Sun and Black Hole Sun, which Suzanne Collins, the author of The Hunger Games, called "imaginative and action-packed." Characters return, new characters are introduced, and the action never stops. Readers embraced the first two books in acclaimed author

David Macinnis Gill's trilogy about Durango, Mimi (his nano-implant with a biting wit), and Vienne (his second-in-command), calling the books non-put-downable, thrilling, funny, and totally satisfying. A surefire bet for fans of dystopian sci-fi, from The Hunger Games to Battlestar Galactica. Cinematic action, rapid-fire dialogue, a futuristic setting on a terraformed Mars, and tragic romance—Shadow on the Sun is an unstoppable adrenaline rush!

Fahrenheit 451 Pan Macmillan

You don't want to mess with Durango. He left his crew behind. His father is dead. And he's going to prove himself to Vienne, even if he dies trying. As he races through flood and fire and across a violent and terrifying planet, there's a 97% chance he's going to die trying. But who's counting.

Corban Addison's debut novel, A Walk Across the Sun, made waves when it was first published, called "pulse-revving with a serious message," by O, the Oprah magazine. John Grisham said, "Addison has written a novel that is beautiful in its story and also important in its message. A Walk Across The Sun deserves a wide audience." A trained lawyer committed to the cause of advancing international human rights and abolishing modern slavery, Addison has written a novel that enlightens while it entertains; A Walk Across the Sun brings together three of

Addison's great passions--storytelling, human rights, and the world's many cultures. Ahalya Ghai and her younger sister Sita are as close as sisters can be. But when a tsunami rips through their coastal village, their home is swept away, and the sisters are the sole survivors of their family. Destitute, their only hope is to find refuge at a convent many miles away. A driver agrees to take them. But the moment they get into that car their fate is sealed. The two sisters--confused, alone, totally reliant on each other--are sold. On the other side of the world, Washington lawyer Thomas Clarke is struggling to cope after the death of his baby daughter and the collapse of his marriage. He takes a sabbatical from his high-pressure job and accepts a position with the Bombay branch of an international anti-trafficking group. Thomas is now on a desperate path to try and save not only himself and his marriage, but also the lives of the two sisters. From the Trade Paperback edition.

An ancient witch named the Shadowless has awoken and escaped from her crypt, and she's looking for revenge on Willow Jane's family. Aleister Crowley's The Book of Lies is an important and complex work of occultism. Deciphering its many layers of hidden meaning requires a little patience and more than a beginner's knowledge of Thelema. For those interested in passing beyond the initiate stage, the reward offered by a deeper understanding of this challenging text is well worth the effort. This new 2018 edition of The Book of Lies from Kismet Publishing restores all of Crowley's original text, including the important keys, sigils and diagrams often omitted from reprints.

Delusions are exposed to reveal the following: The Nazi salute was performed by public officials in the USA from 1892 through 1942. What happened to old photographs and films of the American Nazi salute performed by federal, state, county, and local officials? Those photos and films are rare because people don't want to know the truth about the government's past. Public officials in the USA who preceded the German socialist (Hitler) and the Italian socialist (Mussolini) were sources for the stiff-armed salute (and robotic chanting) in those countries and other

foreign countries. Explore how the "ancient Roman salute" myth originated from the city of Rome in the state of New York (not Italy), Francis Bellamy's hometown. Learn about Mussolini's strange gift to the city of Rome, NY: a statue of two human male infants suckling on a female wolf. That statue remains on display in Rome, NY. See how Boy Scouts and Girl Scouts helped spread the Nazi salute and the swastika to Germany and elsewhere. Discover how Stalin was forced to involuntarily join the allies during WWII. Learn how the word "fascist" is related to the word "faggot." Discover how the military salute was the origin of the Nazi salute. Read why the Pledge of Allegiance would not be performed by anyone today (other than kooks) if the truth were taught in school. Find out who you are, what you are, and how you got to be that way. Also learn who you should blame: your teacher (and the

government's schools). Debunk myths about Adolf Hitler, Joseph Stalin, Vladimir Lenin, Mao Zedong, Francis Bellamy (and his cousin Edward Bellamy), Fascism, Unionism, Socialism, genocide, swastikas, the Pledge of Allegiance to the flag, the cliché "under God," Christianity, modern crusades, ancient Rome, military socialism, Sovietology, crony socialism, and the military-socialism complex.

"Extraordinary Popular Delusions and the Madness of Crowds Today" is long awaited. There is an inferior book from 1841 by author Charles Mackay that is outdated. Mackay's book contains nothing on the 20th century, nor the 21st century, nor the last half of the 19th century. This book provides the latest information. The author Ian Tinny brings the newest delusions and madness that are here for you today! So, let your freak flag fly! The Pointer Institute proudly

presents another news-breaking volume from Ian Tinny and the Dead Writers Club (DWC). Much of the madness is illuminated from the work of the historian Dr. Rex Curry. Tinny is a philologist and a forensic fraud analyst. Tinny's work led to the arrest, trial, conviction, and imprisonment of America's Dumbest Criminals (and the foreclosure of their homes, along with victim restitution liens, and criminal forfeiture judgments, in amounts totaling millions of dollars). Tinny collaborates with the legendary Dead Writer's Club ("DWC" -an author's group) and assists the Pointer Institute for Media Studies to provide remedial education to journalists about history, economics, and government.

Former librarian Claire and Brevity the muse feel the loss of those stories, and are trying to adjust to their new roles within the Arcane Wing and Library, respectively. But

Claire and Brevity are immediately at odds in their approach to the ink, and the potential power that it represents has not gone unnoticed. When a representative from the Muses Corps arrives at the Library to advise Brevity, the angel Rami and the erstwhile Hero hunt for answers in other realms. The true nature of the ink could fundamentally alter the afterlife for good or ill, but it entirely depends on who is left to hold the pen.

Invisible Master A. Strahan Italo Calvino's beloved, intricately crafted novel about an Emperor's travels—a brilliant journey across far-

off places and distant memory. "Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else." In a garden sit the aged Kublai Khan and the young Marco Polo—Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear.

The Victorians were obsessed with death, bereavement, and funeral rituals, and speculated vigorously on the nature of heaven, hell, and divine judgment. This popular abridgement of Michael Wheeler's award-winning *Death and the Future Life in Victorian Literature and Theology* looks at the literary implications of Victorian views of death and the life beyond, and recreates vividly the fear and hope embodied in the theological positions of the novelists and poets of the age. Now accessible to a wide readership, *Heaven, Hell, and the Victorians* offers a wide-ranging and attractively illustrated cultural history of nineteenth-century religious experience, belief, and language in the face of death.

From The New York Times-
bestselling author of *The
Mothers*, a stunning new novel

about twin sisters, inseparable as children, who ultimately choose to live in two very different worlds, one black and one white. The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Many years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen

to the next generation, when their own daughters' storylines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing. Looking well beyond issues of race, *The Vanishing Half* considers the lasting influence of the past as it shapes a person's decisions, desires, and expectations, and explores some of the multiple reasons and realms in which people sometimes feel pulled to live as something other than their origins. As with her New York Times-bestselling debut *The Mothers*, Brit Bennett offers an engrossing page-turner about family and

relationships that is immersive and provocative, compassionate and wise.

Medieval Romance in England

In this enlightened age, Geography has assumed a form so new and interesting, that it has become the study, as well as, the amusement of all ranks of society; the philosopher peruses with admiring attention, the details of the localities of distant climes; and the mere reader instructs as well as amuses himself in turning over the pages of a geographical performance. This science, which till very lately, bore so low a rank in the scale of intellectual attainment, has arisen by the exertions of men of genius, and the increasing commerce of the Atlantic states of Europe to a proud elevation, amid the numerous objects of scientific research; in fact, it blends itself so minutely with almost all of them, that in order to acquire a thorough knowledge of it, it is necessary to study the whole circle of the arts and sciences. Philosophy enables the geographic traveller

to account for the ever varying appearances of nature which meet his wondering sight. Mathematical knowledge gives him the means of calculating with accuracy the positions and forms of the places which arrest his attention in his progress; and, with his apparatus of Astronomical instruments, whether he be in distant Inde, on the snow-capped summits of the Cordillera of the Andes, or in the frozen regions of the north, he is still able to fix the exact route which he intends to follow. Painting, or rather its twin sister, Drawing, is also an acquirement absolutely necessary for the man of research in this science, as by its assistance, he can point out to his brethren, the surprising features of those distant regions, which it is their lot to hear of, but never to see; and by this delightful art, which may well be ranked among the first of gifts to man, he can bring home to the imagination the forms of things unknown. Poetry is not without its share in assisting to give just notions of geographic details, as by its fascinating aid, the ideas which we form of

distant objects are heightened and impressed on our memories; and without the fellowship of History, Geography would prove the most uninteresting of studies. But there are other branches of philosophy, which have of late given a form and stability to the pursuit of knowledge in this science, and by whose powerful co-operation the march of geographical acquisition is daily spreading over a wider and more noble field. Chemistry has within the last century, assumed a character so widely different from its ancient bounds, that the world is as it were a new region. We have become acquainted with phenomena, which were not before imagined to exist, and we can trace the causes, and consequently the effects of many of the operations of nature, which had hitherto baffled all the efforts of man. Geology, Mineralogy, and Oryctology, have also, as a consequence of the advanced state of chemical knowledge, become so universally studied, that no modern writer of travels ought to be unacquainted with, at least, their leading principles, and to

render his labours very acceptable to the public, he should possess an accurate and extended knowledge of these branches of science. Zoography has a close connection with the details of Modern Geography, as without a description of the properties and forms of the various races of animals, which all-bounteous Providence has placed on the Earth, for the sustenance or the use of man, a mere outline of the features of kingdoms and states would be, though not useless, yet uninteresting. Botany also takes an active part in the formation of works of this nature, and perhaps, no other science has a more pleasing share in such undertakings, for every day, and almost every hour, discloses to the phytologist some new and singular variety of Nature's performance.
