There is no product
on the planet that
enjoys the devotion of
a Macintosh
computer. Famously
dedicated to their
machines, many Mac

fans eat, sleep, and breathe Macintosh. The Cult of Mac is the first book about Macintosh culture, arguably the largest distinct subculture in computing. Written by Wired News managing editor Leander Kahney, The Cult of Mac is an in-depth look at Mac users and their unique, creative, and often very funny culture. Like fans of a football team or a rock group, Macintosh fans have their own customs, with clearly defined obsessions, rites and passages. From people who get Mac tattoos and haircuts, to those who furnish their apartments with empty Mac boxes, this book details Mac fandom in all of its forms. The paperback edition includes an all-

new chapter about the iPod, updates throughout, and new photos that reflect current Apple technology.

Creating Mobile Apps with jQuery Mobile - Second Edition

Apple's latest iPad tablet has been an incredible success and generated a lot of interest from photographers soon after it was released. Instead of hauling a laptop along on vacation or to a photo shoot, a photographer can bring the lightweight iPad and take advantage of its large screen, third-party software, and online

access. The iPad is great for reviewing photos on-site using something other than a camera's small LCD, editing photos, presenting a photographer's portfolio, and more. This fully updated 2nd edition of the iPad for Photographers will help novice, intermediate, and pro shooters to:

- Get photos onto the iPad. Import using the camera connection kit.
- Take photos with the iPad.
- Back up photos.
- Copying photos from memory cards; using iCloud Photo
- Stream as online backup; uploading

files to Dropbox; and so on.

- Organize your photos.
- Rate photos and assign tags in the field--instead of waiting until you get home!
- Edit photos on the iPad.
- Share photos with others: iCloud Photo Stream, play on an Apple TV, and more.
- Create your portfolio. Use portfolio software to give impressive presentations to prospective clients. Great for wedding photographers meeting people face to face, for example.
- Video. Edit clips in iMovie, create

slideshows, rough cuts, and more. In addition, photographers will learn other clever uses for their iPad, such as triggering the shutter using an iPad; using the screen as a fill flash; storing PDFs of camera manuals, books, etc.; and much more!
