[Ipcr Financial Management Ratio Analysis](#)

Ratio is an expression of relationship between two or more items in mathematical terms. Exhibition of meaningful and useful relation between different accounting data is called Accounting Ratio. Ratio may be expressed as a:b (a is to b), in terms of simple fraction, integer, or percentage. If the current assets of a concern is Rs 4,00,000 and the current liabilities is Rs 2,00,000, then the ratio of current assets to current liabilities is given as $4,00,000 / 2,00,000 = 2$.

Ratio analysis—the foundation of fundamental analysis—helps to gain a deeper insight into the financial health and the current and probable performance of the company being studied. For this insight, the analysts use the quantitative method where the information recorded in the company 's financial statements are compared and analyzed.

Lecture-61-CA IPCC/Intermediate Financial Management ...

Ratio analysis is the process of comparing and quantifying relationships between financial variables, such as those variables found in the statement of financial position and income statement of a company. The ability to carry out effective ratio analysis and to be able to interpret the meaning of ratios is fundamental to the F9 syllabus.
