The coaching process is about enhancing performance by providing feedback about the performance to the athlete or team. Researchers have shown that human observation and memory are not reliable enough to provide accurate and objective information for high-performance athletes. Objective measuring tools are necessary to enable the feedback process. These can take the form of video analysis systems post-event, both biomechanical and computerised notation systems, or the use of in-event systems. *Essentials of Performance Analysis in Sport 3rd Edition* is fully revised with updated existing chapters and the addition of 12 new chapters. It is a comprehensive and authoritative guide to this core discipline of contemporary sport science. The book offers a full description of the fundamental theory of match and performance analysis, using real-world illustrative examples and data throughout. It also explores the applied contexts in which analysis can have a significant influence on performance. To this end the book has been defined by five sections. In Section 1 the background of performance analysis is explained and Section 2 discusses methodologies used in notating sport performance. Current issues of performance analysis applied research, such as chance, momentum theory, perturbations and dynamic systems are explored in Section 3. Profiling, the essential output skill in performance analysis, is examined in depth in Section 4. The book's final section offers invaluable applied information on careers available for performance analysts. With extended coverage of contemporary issues in performance analysis and contributions from leading performance analysis researchers and practitioners, *Essentials of Performance Analysis in Sport 3rd Edition* is a complete textbook for any performance analysis course, as well as an invaluable reference for sport science or sport coaching students and researchers, and any coach, analyst or athlete looking to develop their professional insight.

Word embeddings are a form of distributional semantics increasingly popular for investigating lexical semantic change. However, typical training algorithms are probabilistic, limiting their reliability and the reproducibility of studies. Johannes Hellrich investigated this problem both empirically and theoretically and found some variants of SVD-based algorithms to be unaffected. Furthermore, he created the JeSemE website to make word embedding based diachronic research more accessible. It

provides information on changes in word denotation and emotional connotation in five diachronic corpora. Finally, the author conducted two case studies on the applicability of these methods by investigating the historical understanding of electricity as well as words connected to Romanticism. They showed the high potential of distributional semantics for further applications in the digital humanities.

Sahaptin, or Ichishkin Snwit (literally, "this language"), is a Plateau Penutian language spoken in south-central Washington and northern Oregon. This dictionary documents the dialect of Sahaptin that is spoken by the Yakama people. Ichishkin Snwit Yakama / Yakima Sahaptin Dictionary is the first modern published dictionary of any Sahaptin dialect. The dictionary is divided into three sections: a Sahaptin-English section; an English-Sahaptin section; and a section listing roots used in the formation of Sahaptin words. The Sahaptin-English section contains approximately 3,500 headwords, over 4,500 example sentences, more than 100 images, and over 9,200 sound files available online. Copious cross-references alert readers to related words elsewhere in the Sahaptin-English section. The English-Sahaptin and roots sections serve as indices to the Sahaptin-English section. In the English-Sahaptin section, users can look up the Sahaptin equivalents of English words. In the root section, users can see words from different parts of the dictionary that share the same component of meaning. The dictionary also contains essays by noted Plateau linguist Bruce Rigsby (professor emeritus, University of Queensland) on the histories and current usage of the terms "Sahaptin" and "Yakima / Yakama."
