On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global

obsession. The Perfect Thing is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music.

Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on "the iPod generation." Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social cachet it lends them, even wondering whether the device itself has its own musical preferences.

Steven Levy, the chief technology correspondent for Newsweek magazine and a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get

it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store. (We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive

qualities of the iPod itself, *The Perfect Thing* shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. "Shuffle" is a hallmark of the digital age -- and *The Perfect Thing*, via sharp, insightful reporting, is the perfect guide to the deceptively diminutive gadget embodying our era. *The Rough Guide to iPods, iTunes &*

This pioneering book homes in on repair as an everyday practice. Bringing together exemplary ethnographies of repair work around the world, it examines the politics of repair, its work settings and intricate networks, in

and across a wide range of situations, lay and professional. The book evidences the topical relevance of situated inquiry into breakdown, repair, and maintenance for engaging with the contemporary world more broadly.

Airplanes and artworks, bicycles and buildings, cars and computers, medical devices and mobile phones, as virtually any commodity, infrastructure or technical artifact, have in common their occasional breakdown, if not inbuilt obsolescence. Hence the point and purpose of closely examining how and when they are fixed.

New York Times, Wall Street Journal, and USAToday Bestseller Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design,

startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one,

charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of

Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making. Improvement Of The New Ipod First Rank Publishing Here is the essential
